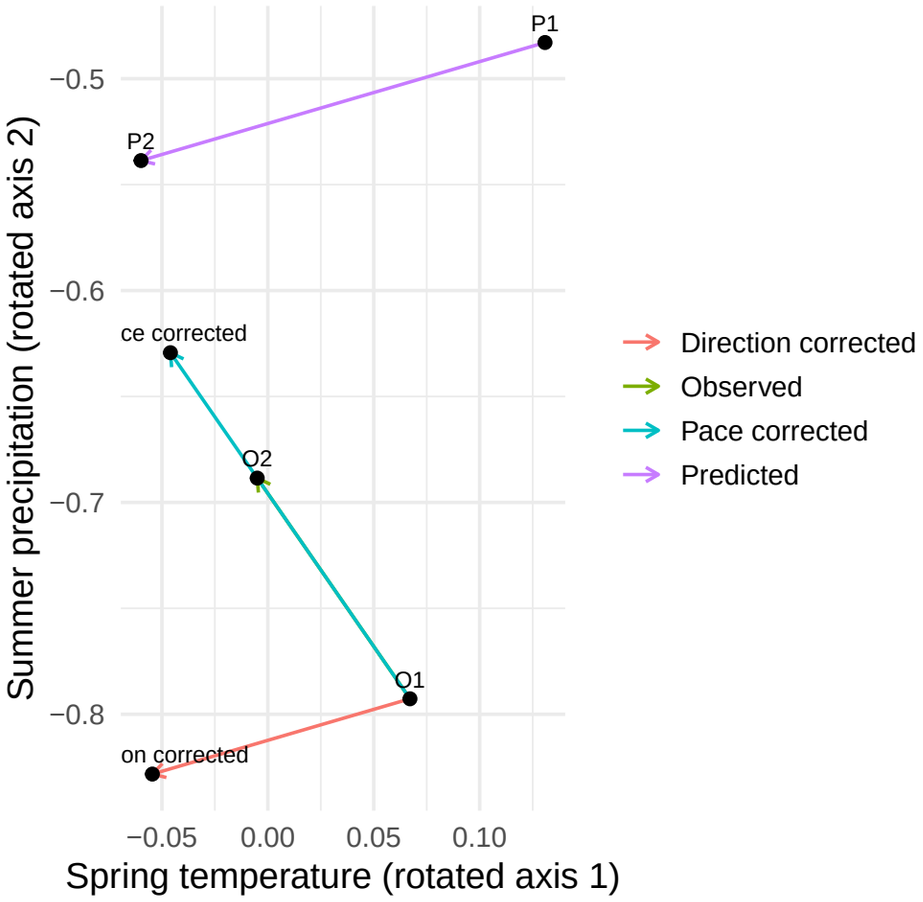
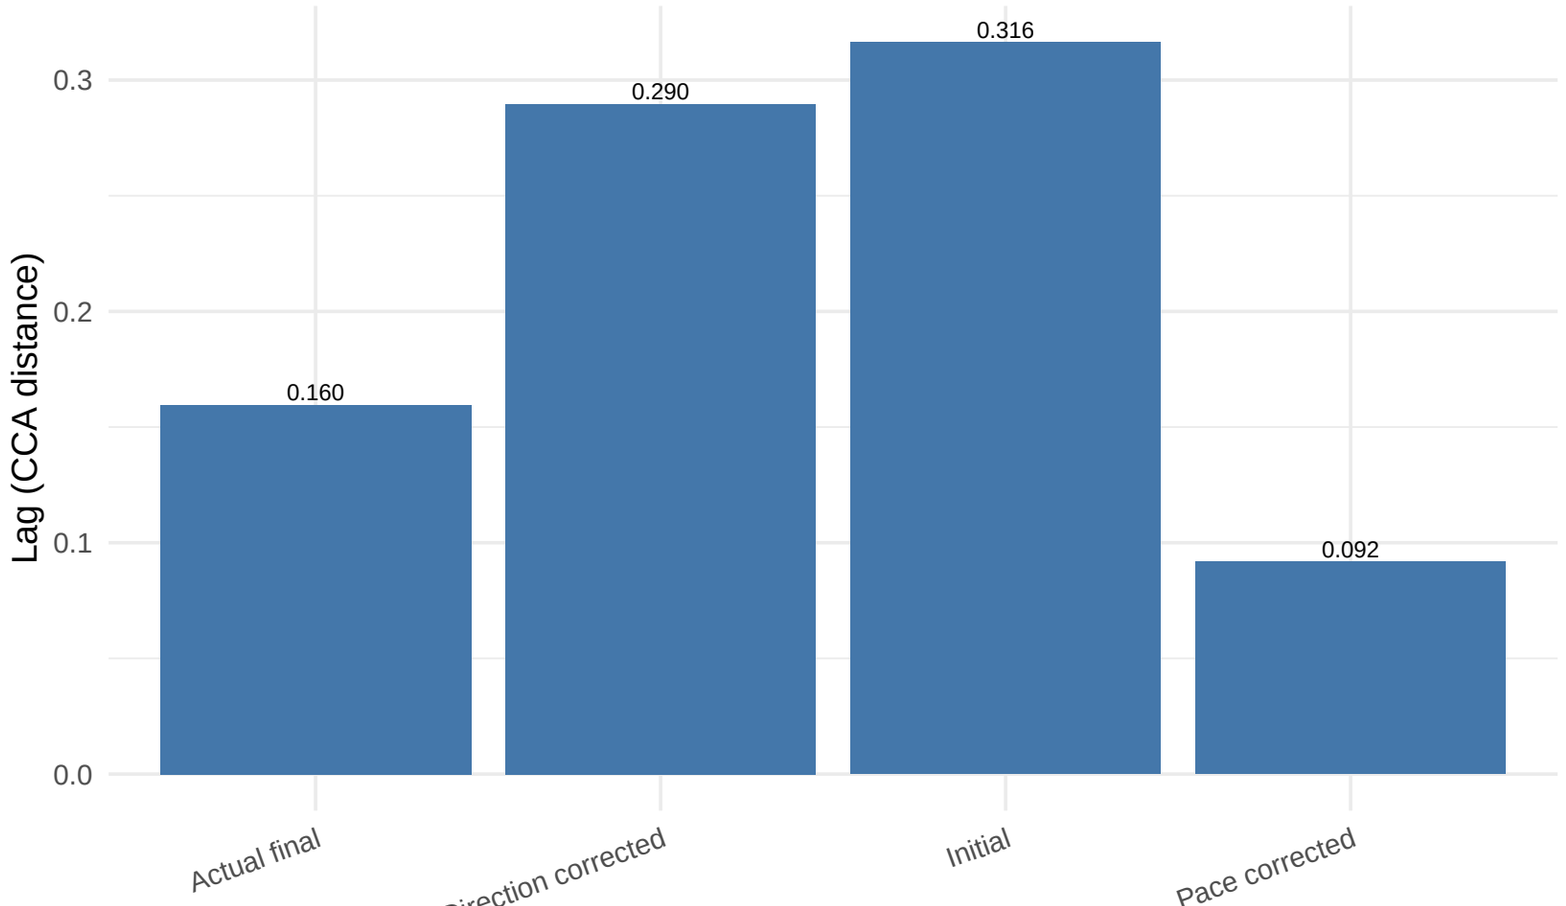
Panther Potholes lake−period S4: 4850 to 2250 cal BP

Elapsed time between the two sampled centuries: 2600 years

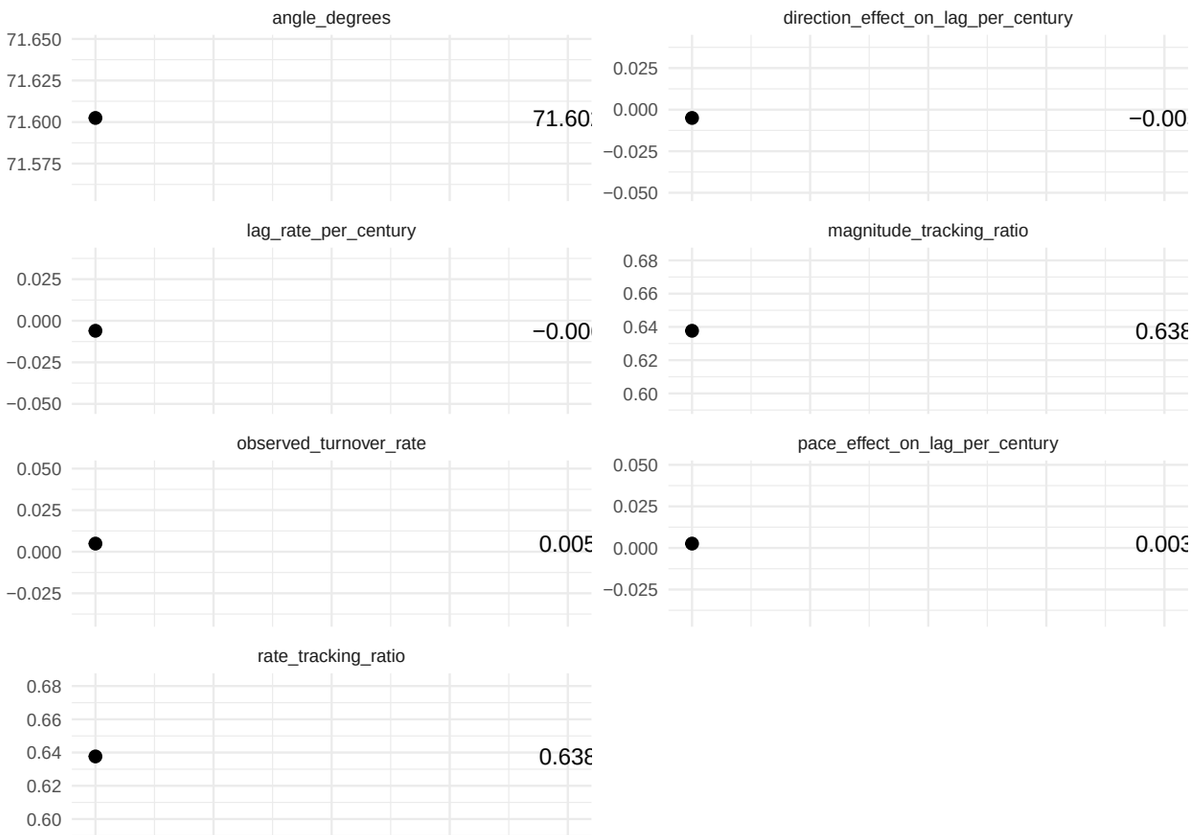
## A. Actual and corrected movement (Panther Potholes, S4, 4850 to 2250 cal BP)



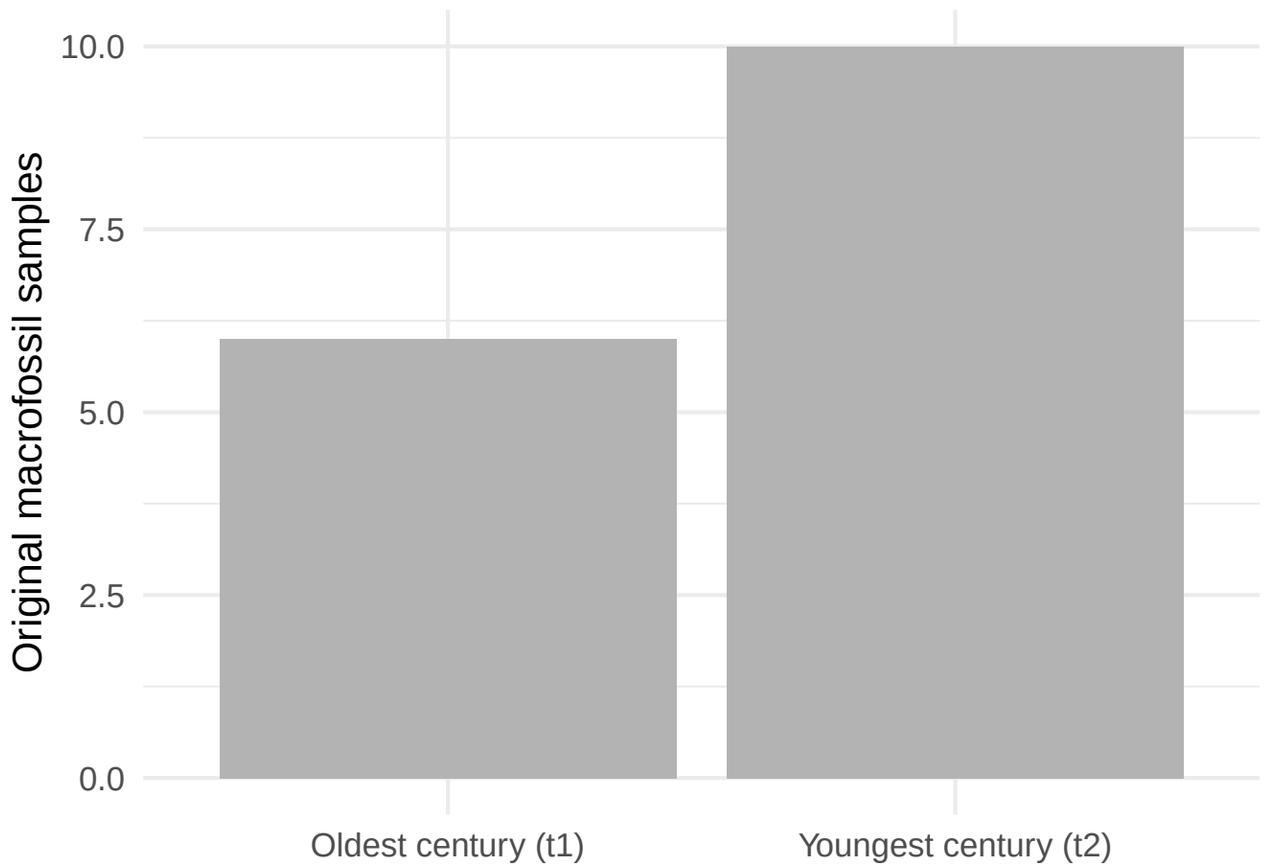
## B. Distance to actual endpoint



## C. Focused quantities for this lake−period



## D. Actual endpoint sampling



Sample WA positions are averaged within each sampled century. Axes rotated for display; all quantities are rotation−invariant. Corrections start at O1.
