Holocene taxon−direction audit (NOCA stability/high−fire has n = 2 dates)

Boxplots describe site−date estimates after the full chronology hierarchy; points are individual valid units and are not confidence intervals.

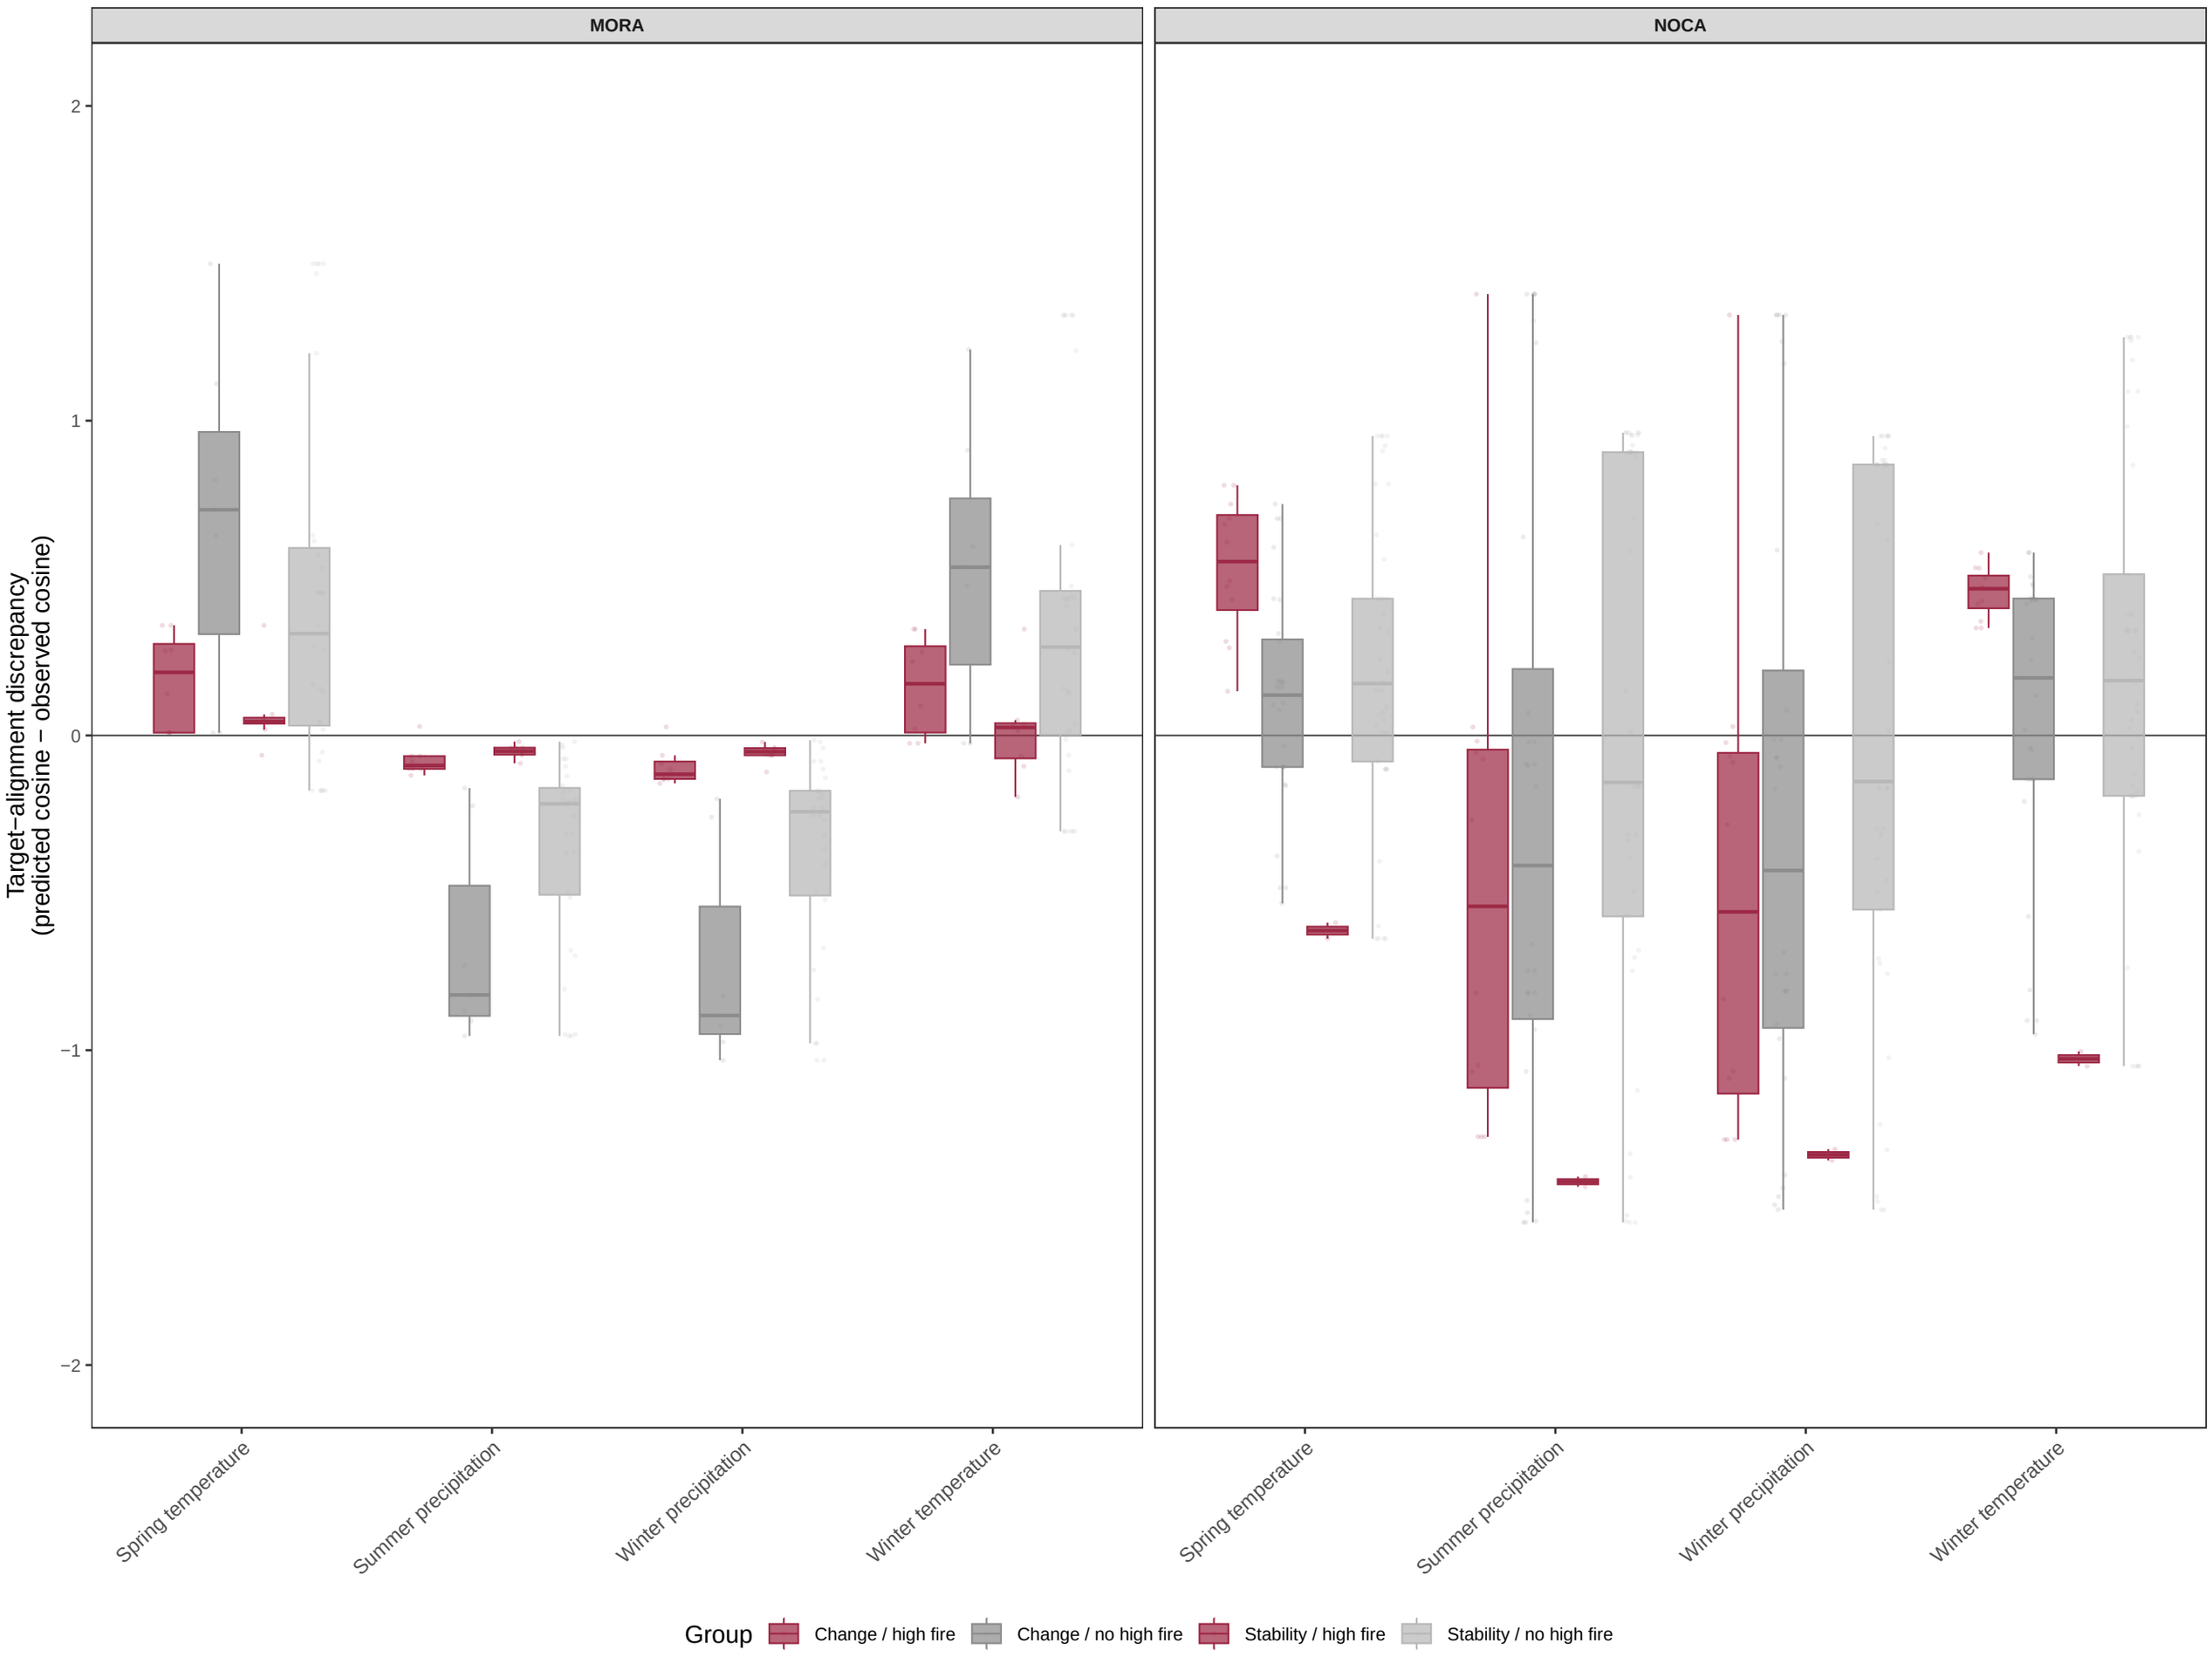

Anthropocene taxon−direction audit (MORA burned has n = 2 plots)

Boxplots describe paired ecological plots; points are individual valid units and are not confidence intervals.

Holocene climate−arrow direction−difference audit

Boxplots describe hierarchically summarized site−dates; points are individual valid units and are not confidence intervals.

Anthropocene climate−arrow direction−difference audit

Boxplots describe paired ecological plots; points are individual valid units and are not confidence intervals.
