Species contributions along climate-predicted movement

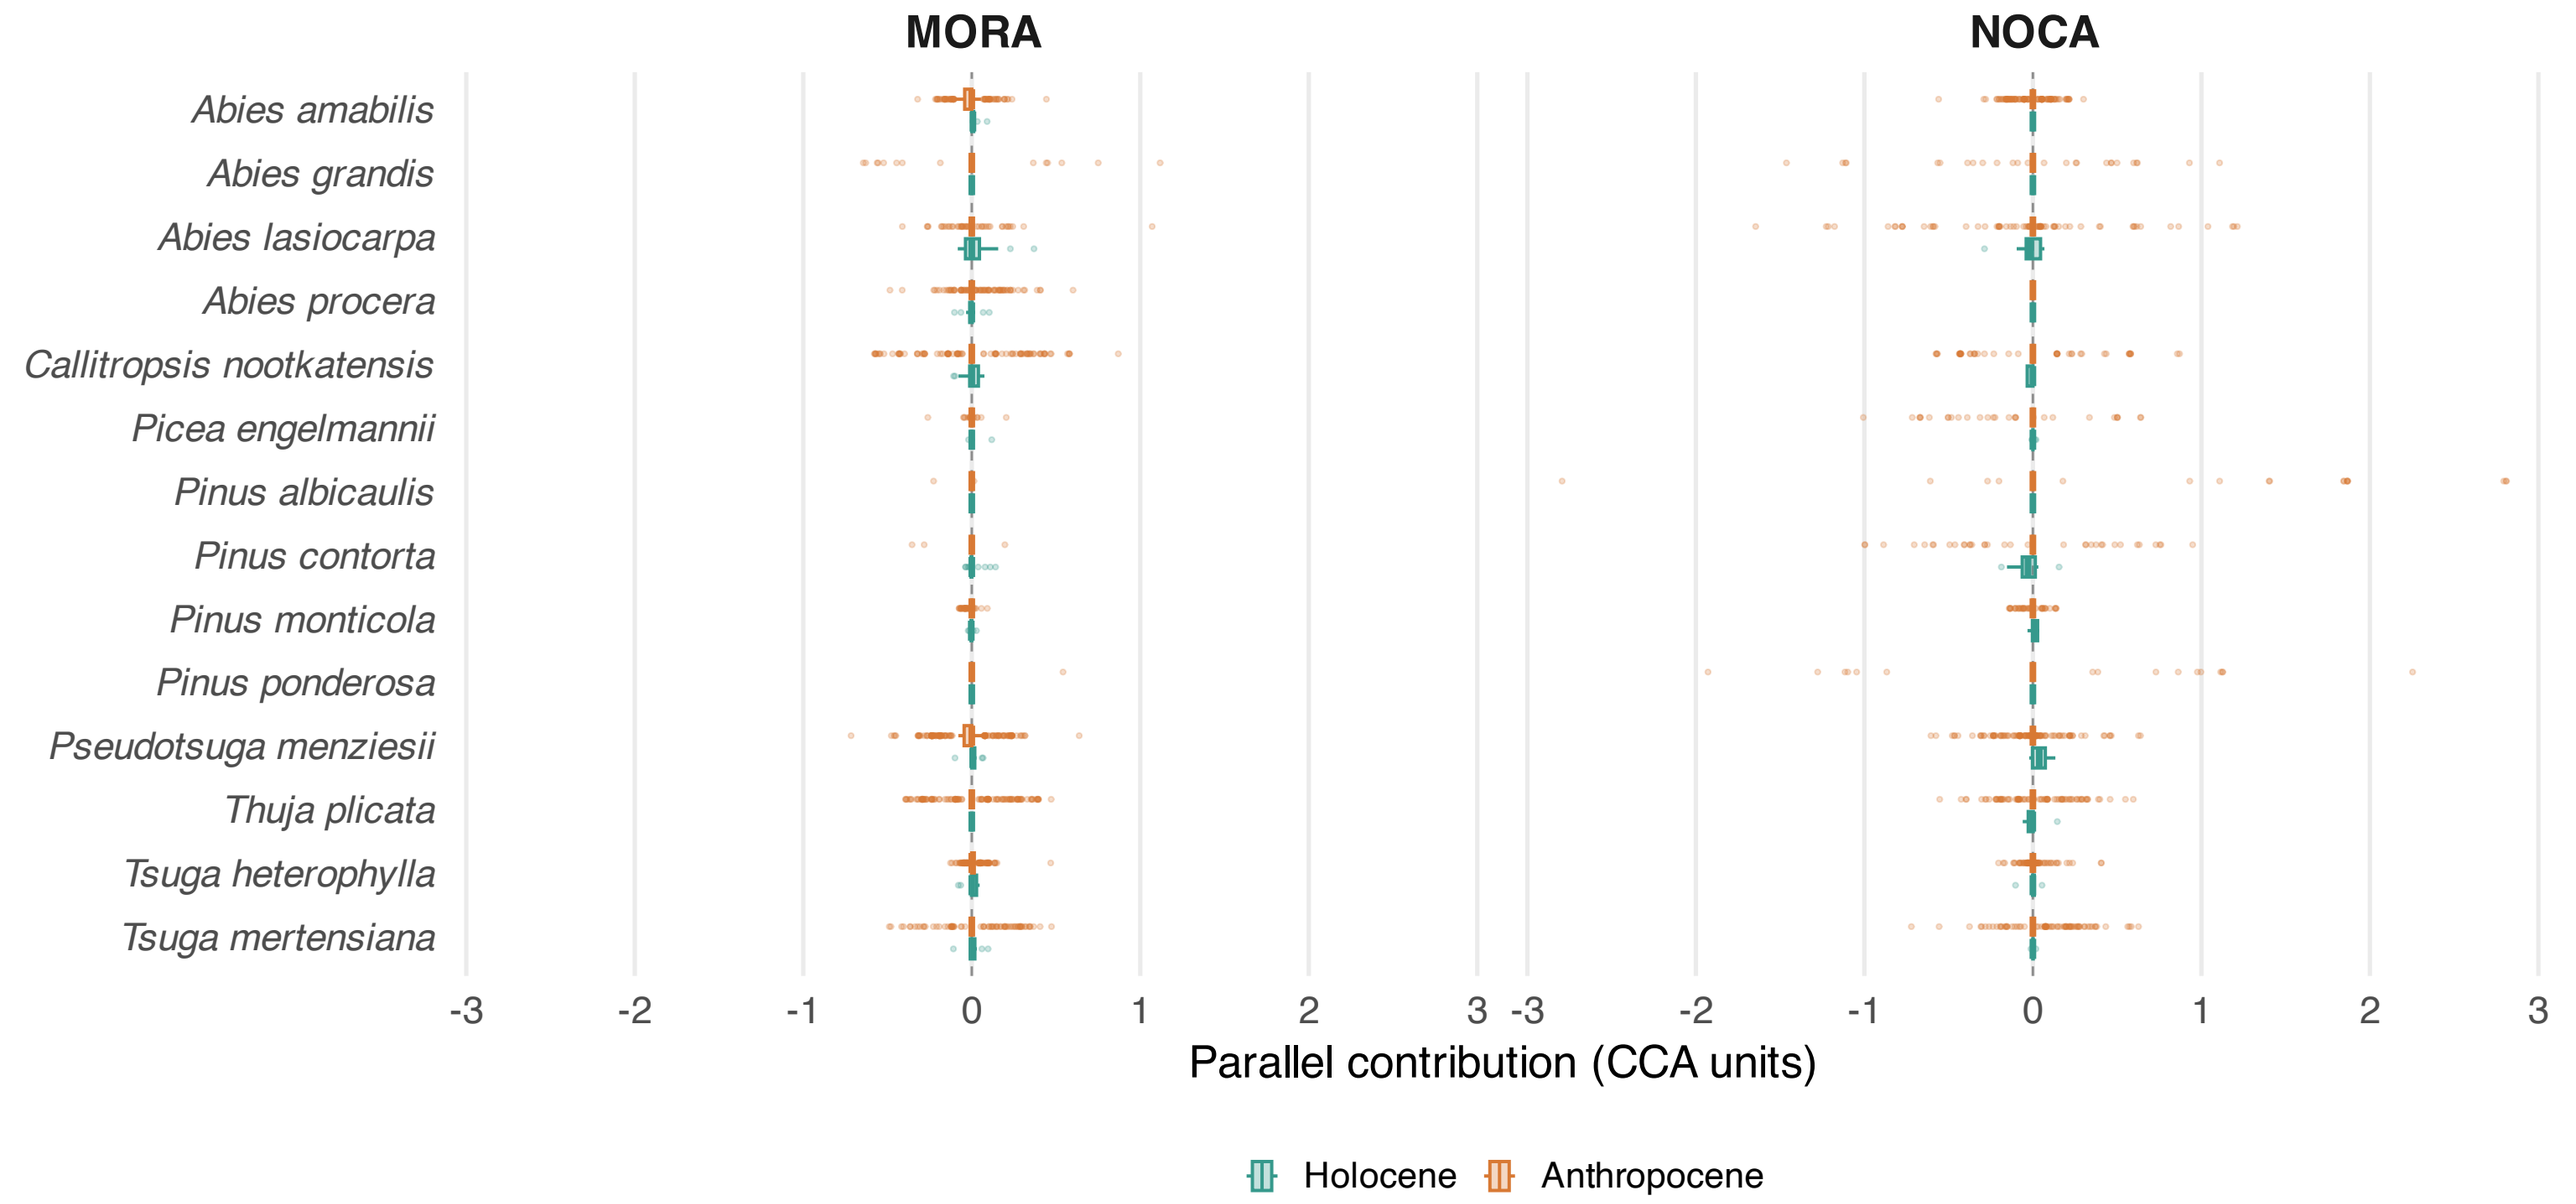

Offset 0 • Holocene: transition medians across valid Bacon draws; Anthropocene: individual plots

Boxes: median and quartiles; whiskers: 1.5 × IQR. Undefined projections omitted; zero contributions retained. Descriptive distributions.

Species contributions along climate-predicted movement

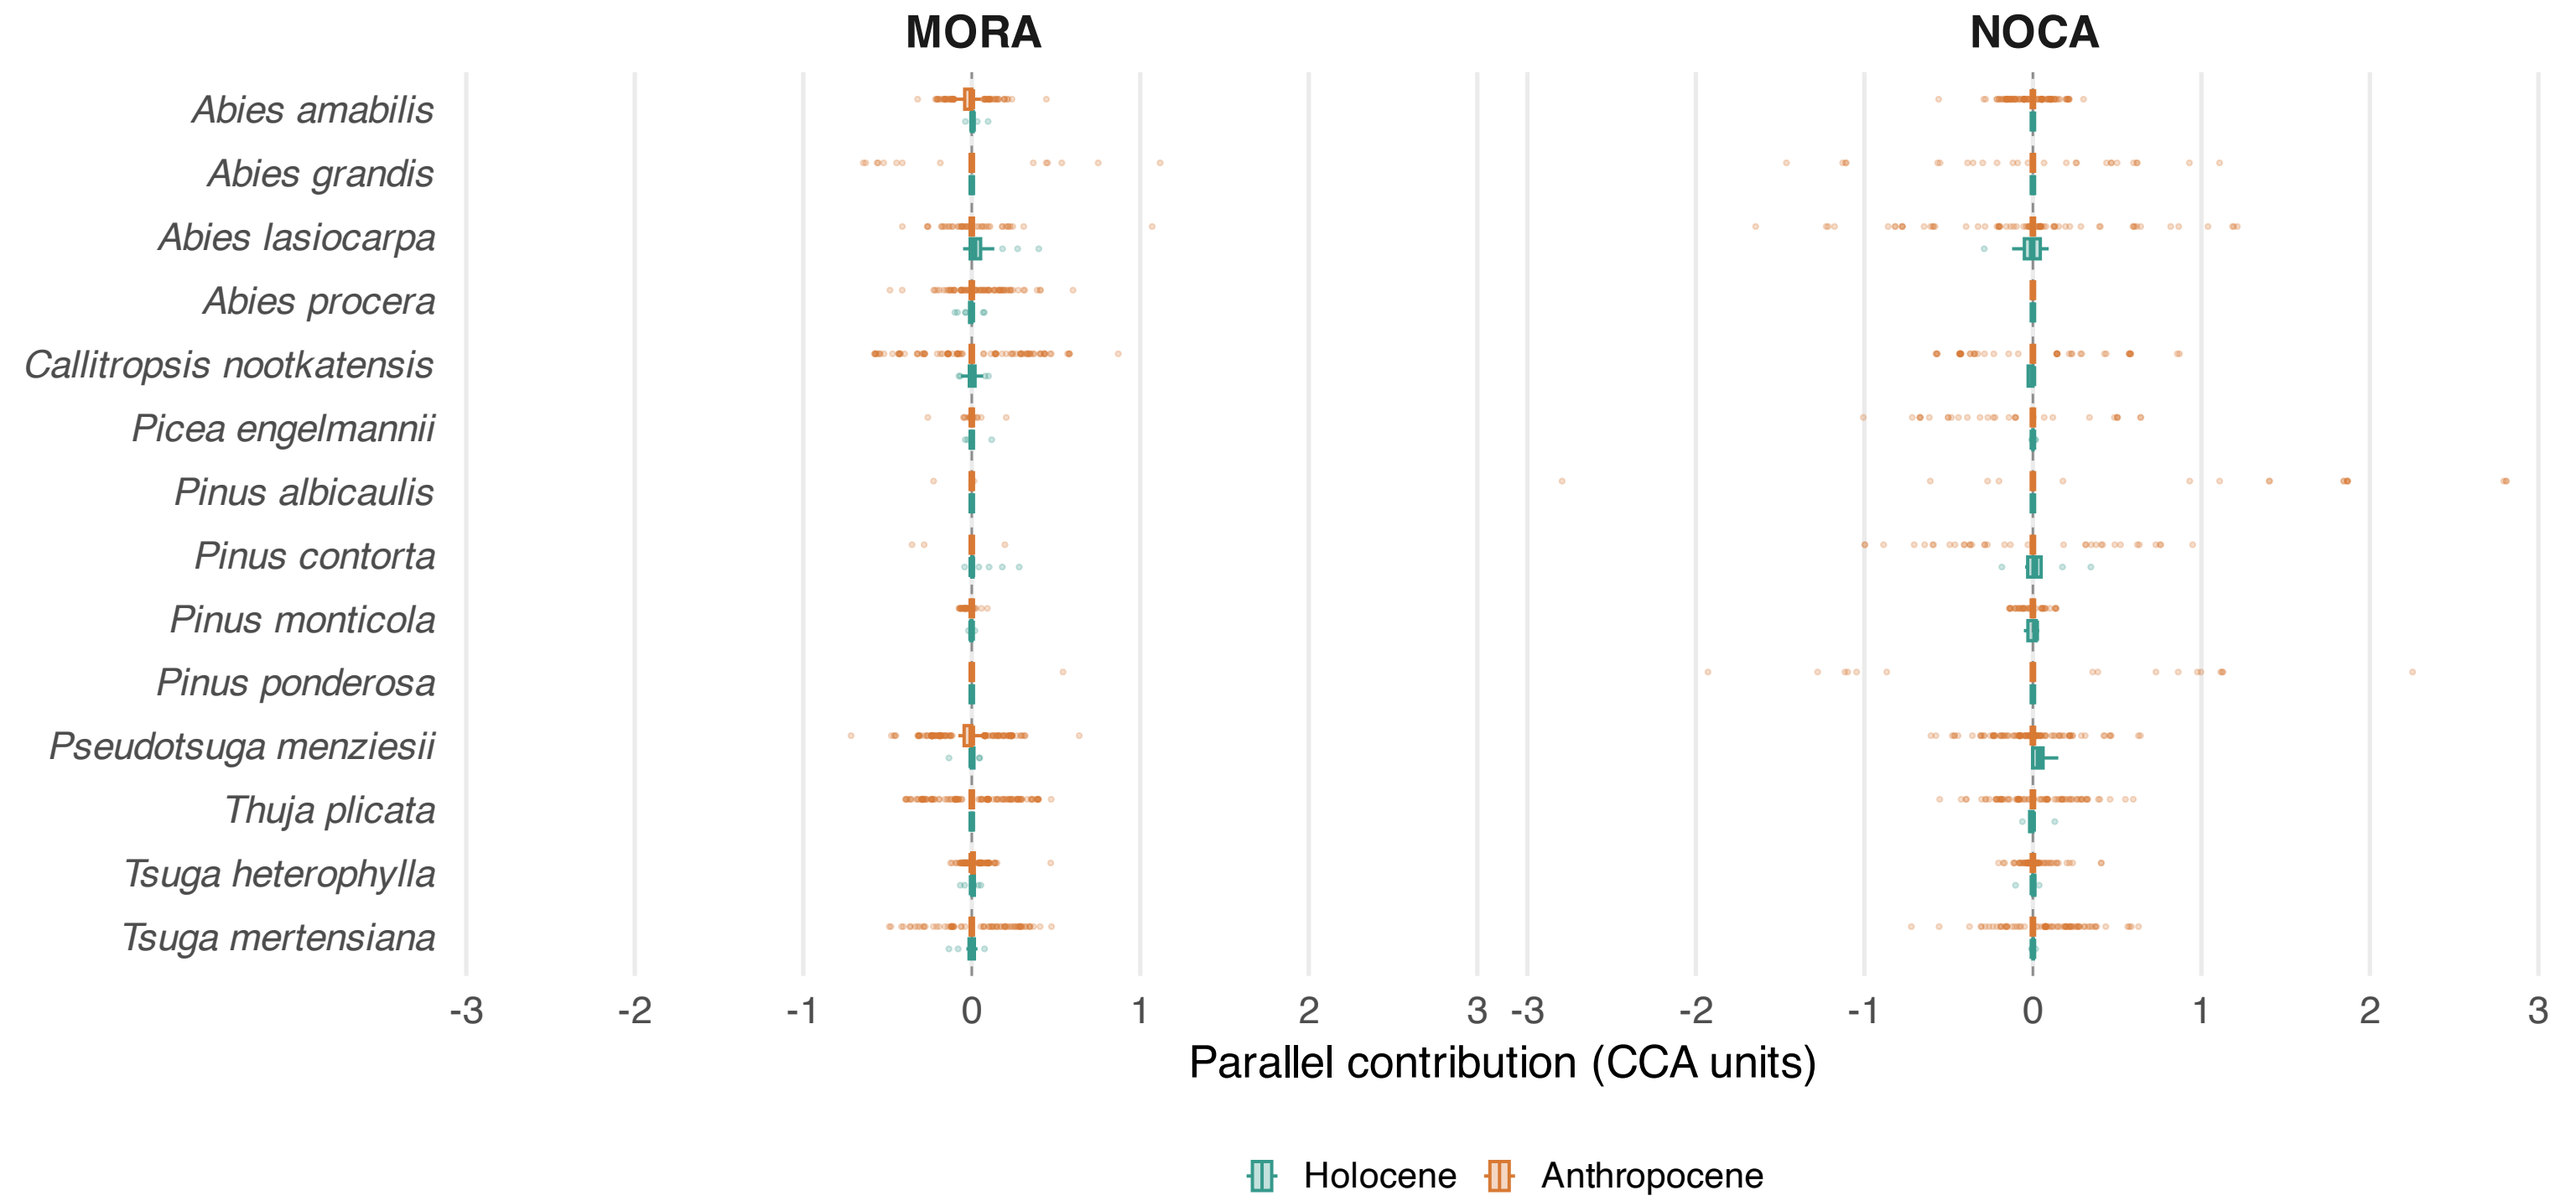

Offset 100 • Holocene: transition medians across valid Bacon draws; Anthropocene: individual plots

Boxes: median and quartiles; whiskers: 1.5 × IQR. Undefined projections omitted; zero contributions retained. Descriptive distributions.

Species contributions along climate-predicted movement

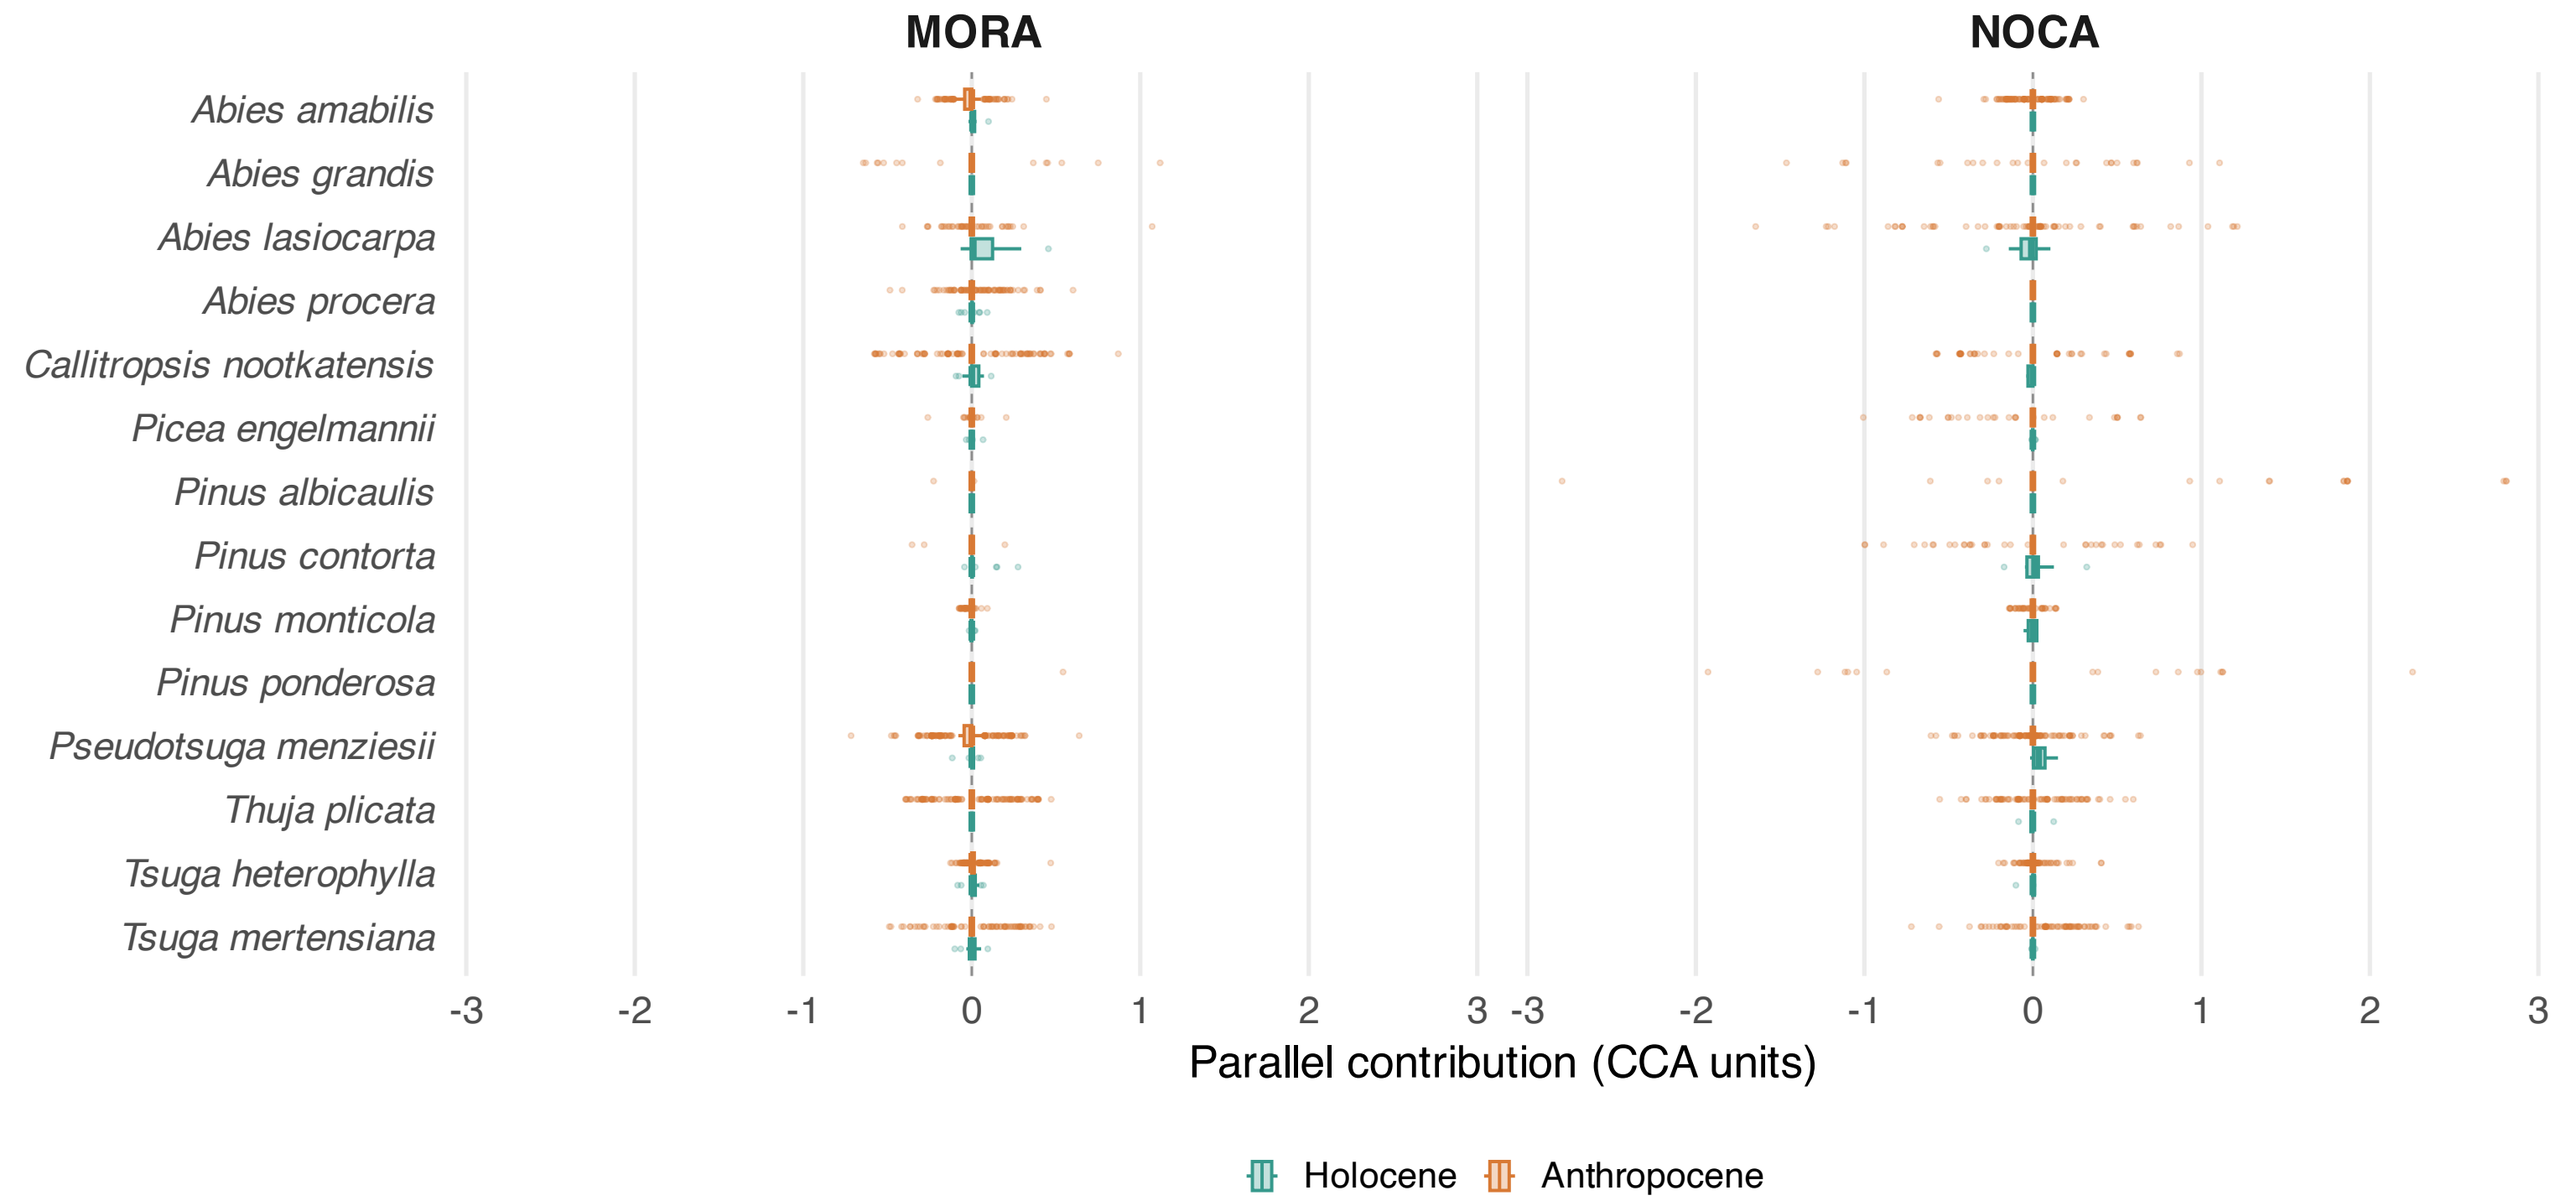

Offset 200 • Holocene: transition medians across valid Bacon draws; Anthropocene: individual plots

Boxes: median and quartiles; whiskers: 1.5 × IQR. Undefined projections omitted; zero contributions retained. Descriptive distributions.

Species contributions along climate-predicted movement

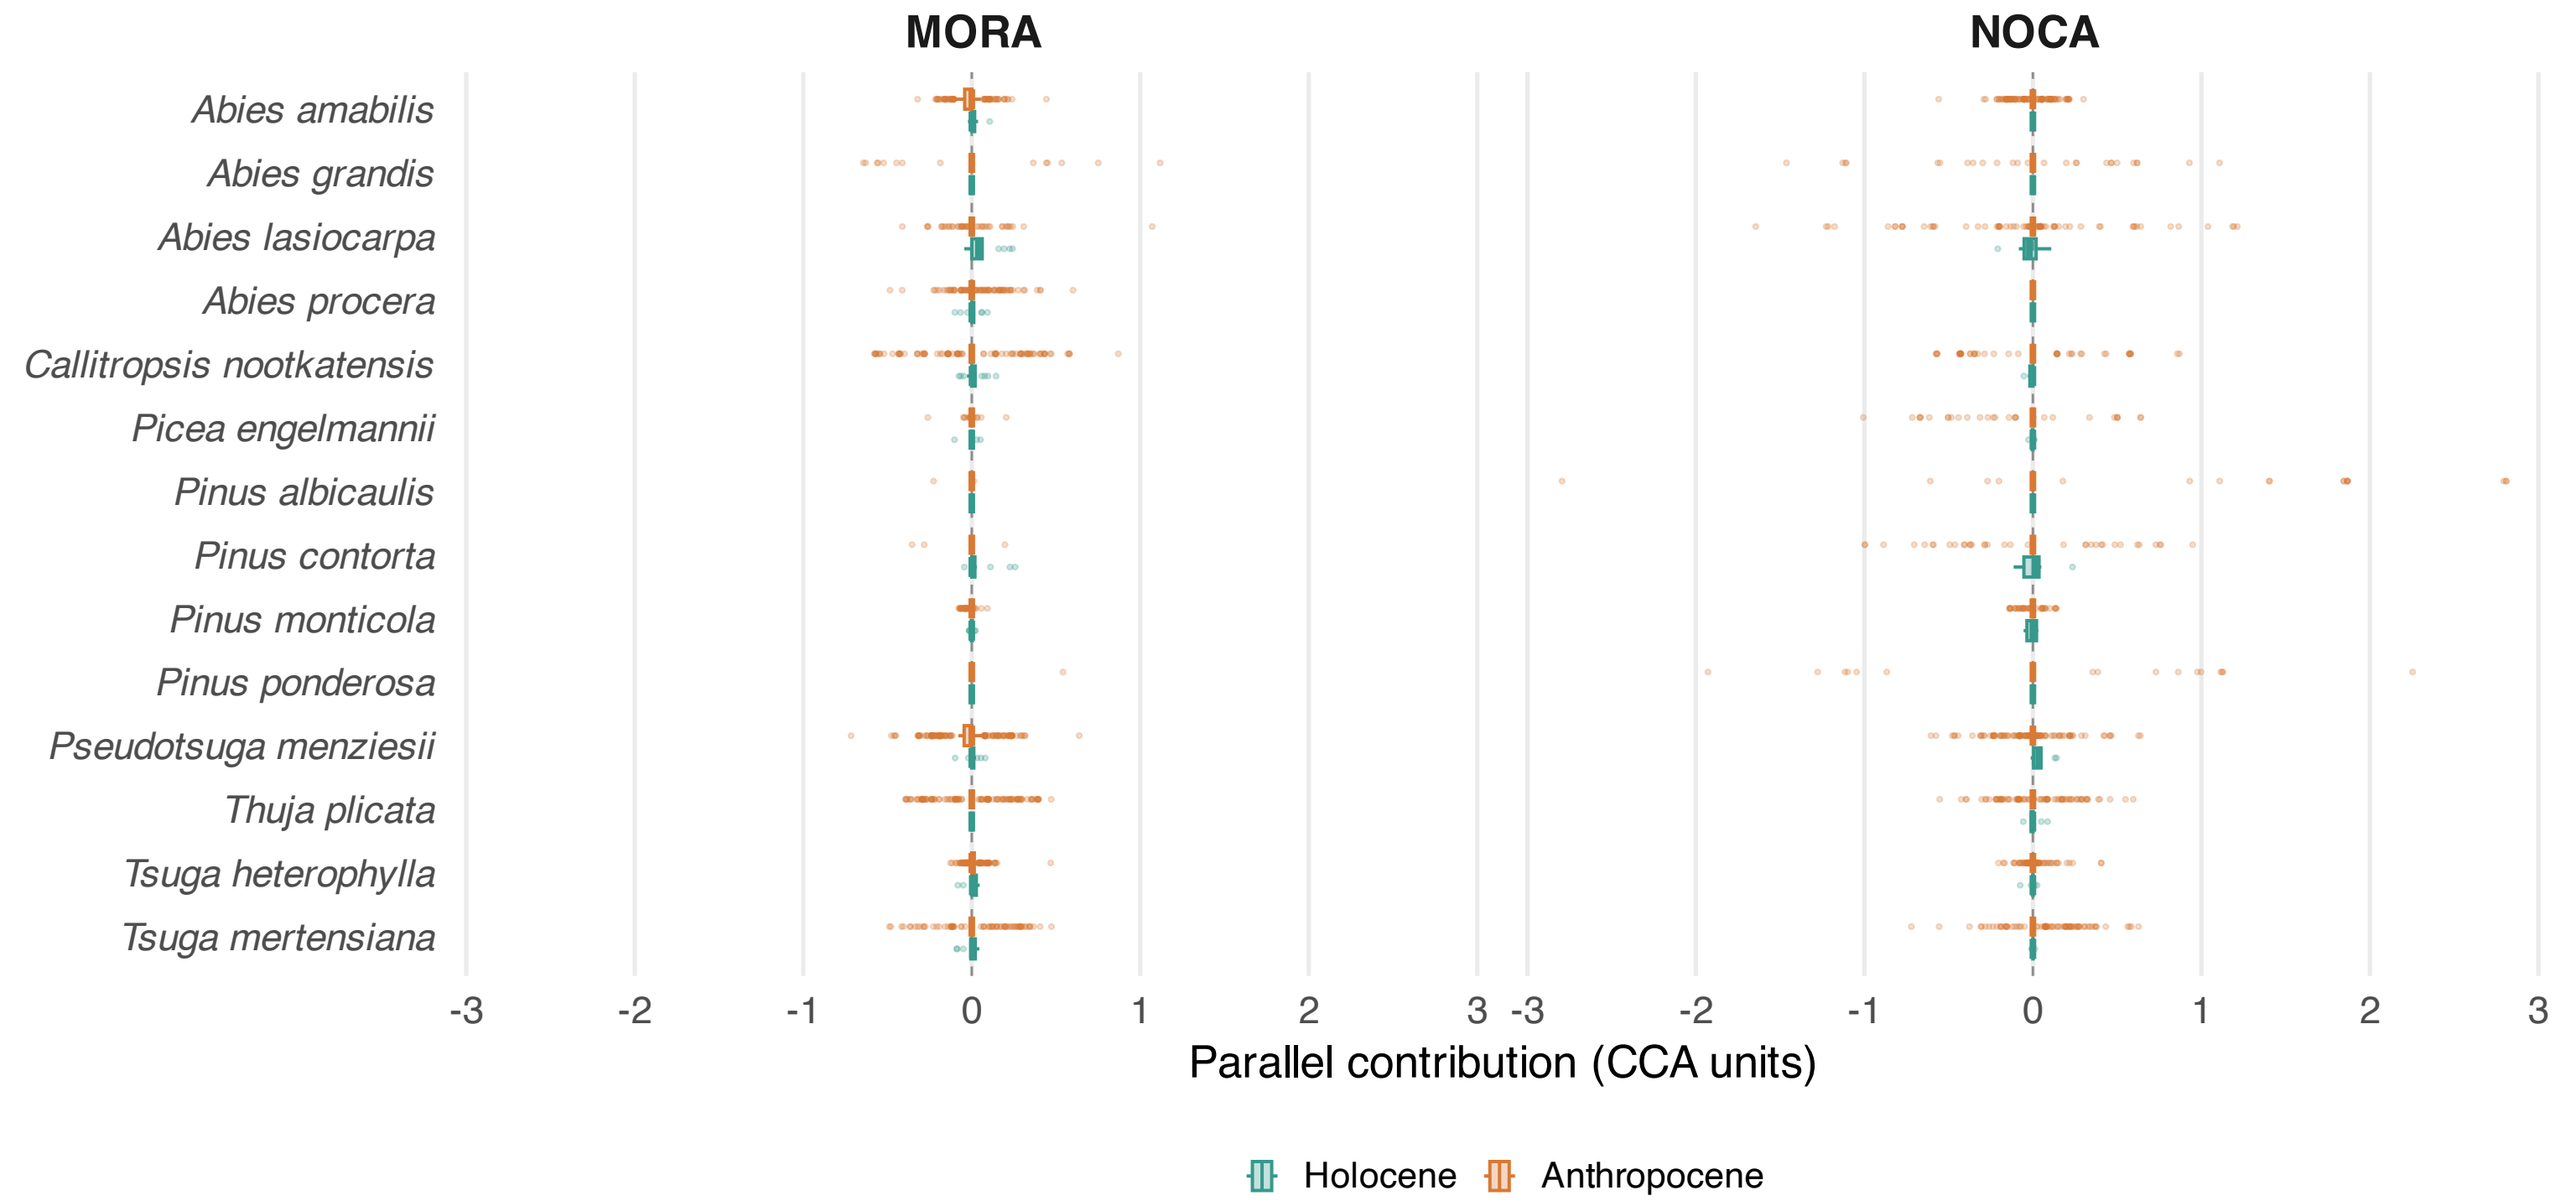

Offset 300 • Holocene: transition medians across valid Bacon draws; Anthropocene: individual plots

Boxes: median and quartiles; whiskers: 1.5 × IQR. Undefined projections omitted; zero contributions retained. Descriptive distributions.

Species contributions along climate-predicted movement

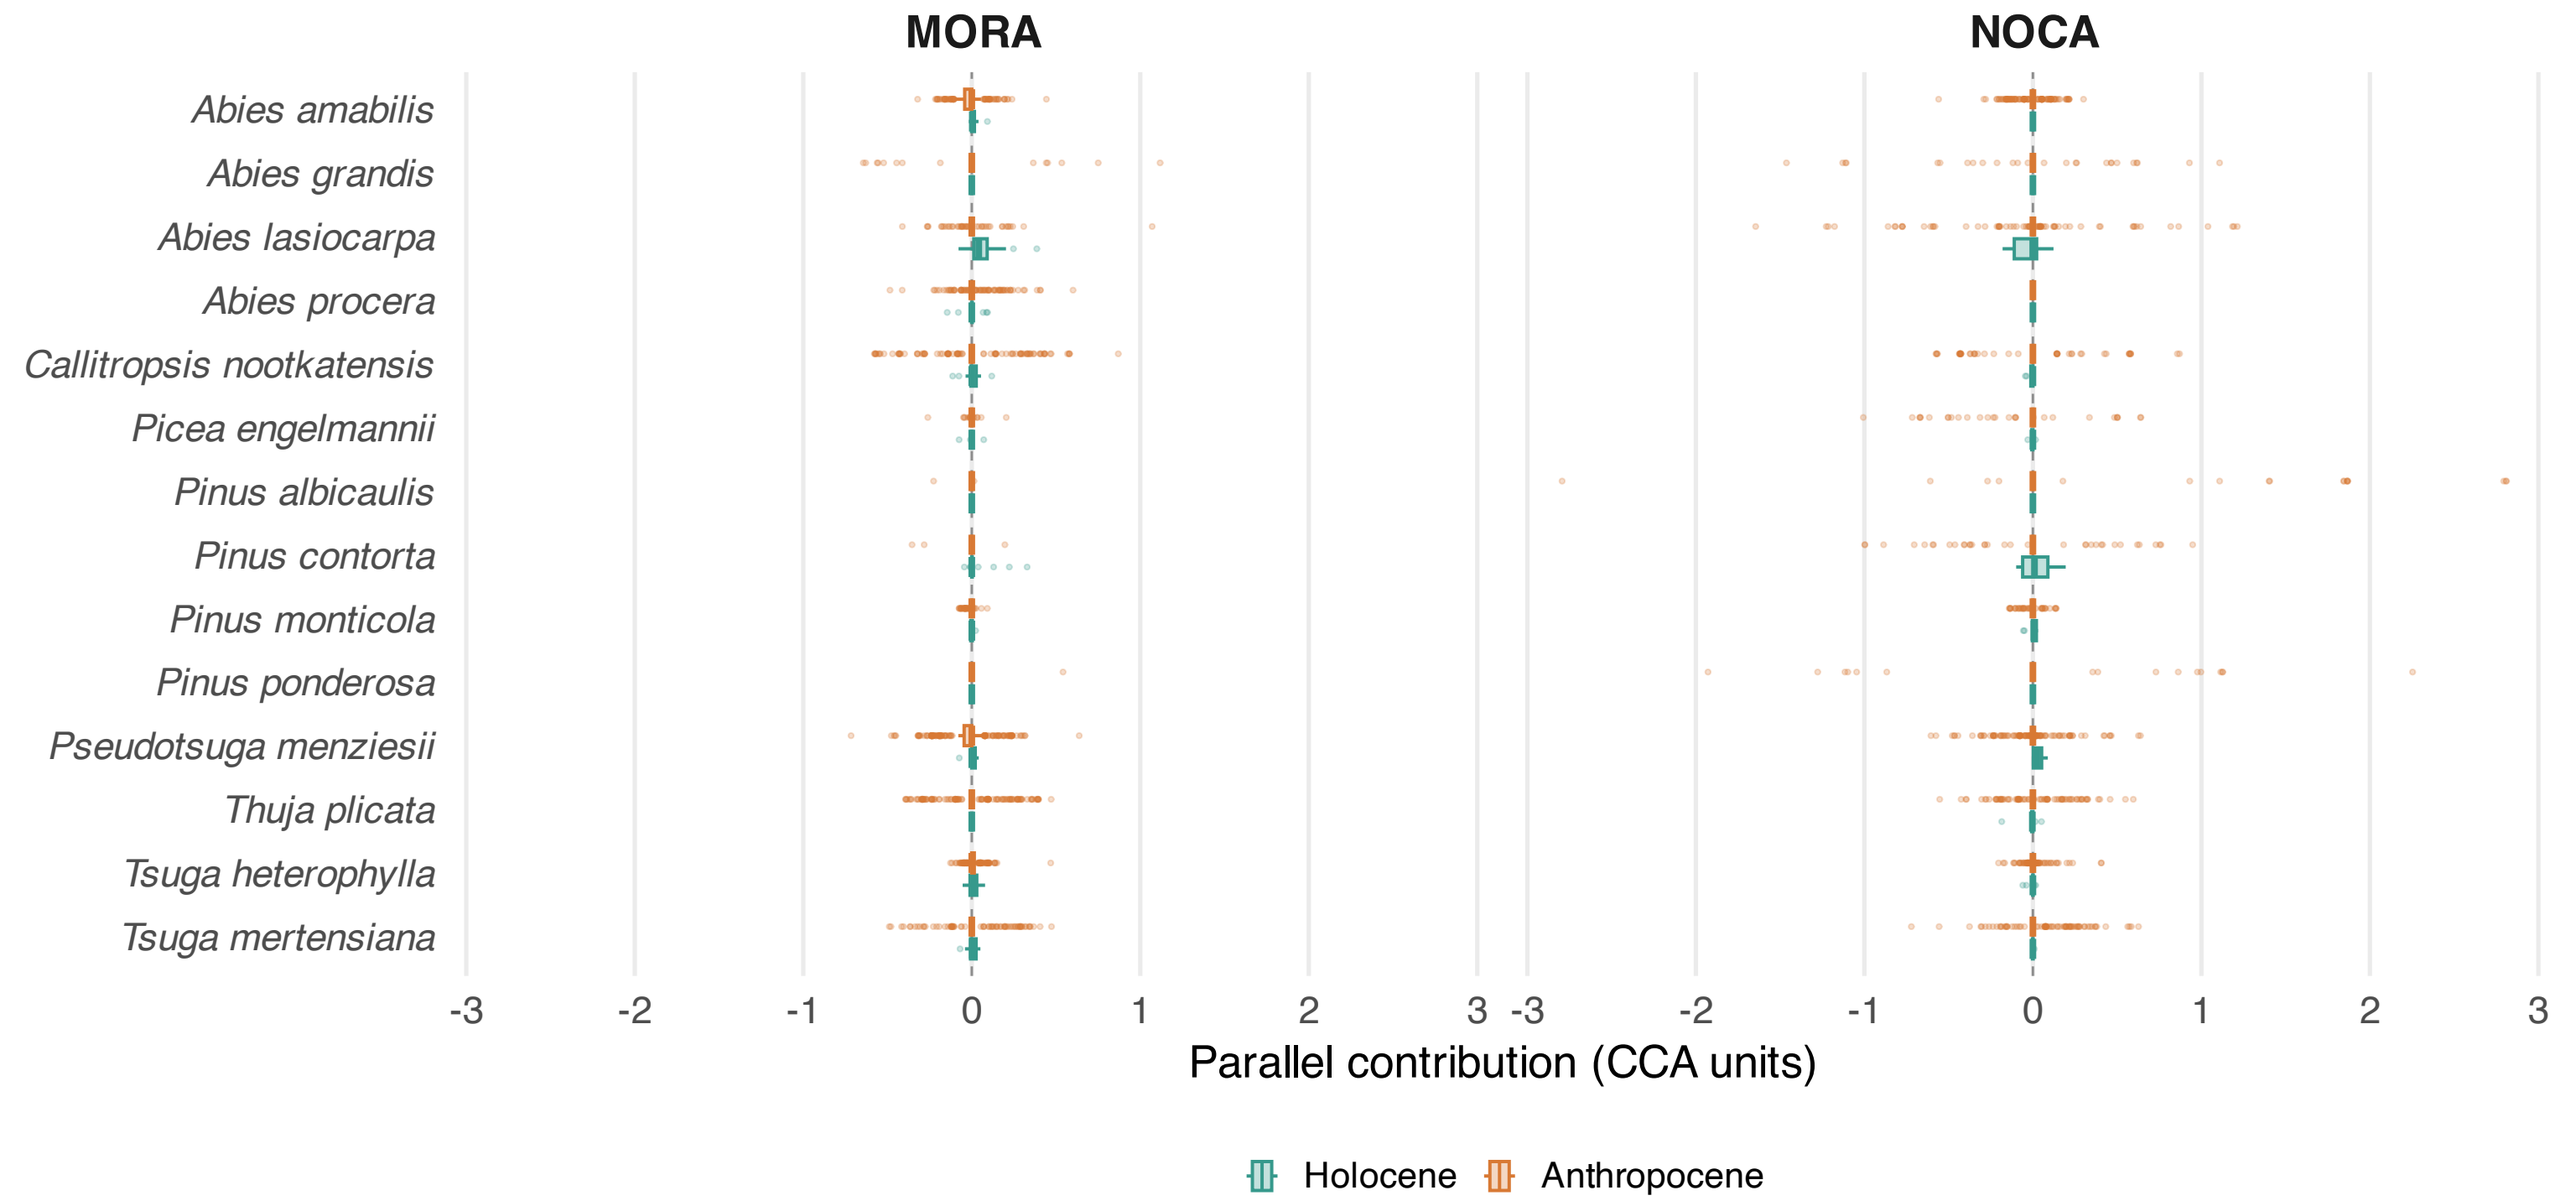

Offset 400 • Holocene: transition medians across valid Bacon draws; Anthropocene: individual plots

Boxes: median and quartiles; whiskers: 1.5 × IQR. Undefined projections omitted; zero contributions retained. Descriptive distributions.

Species contributions along climate-predicted movement

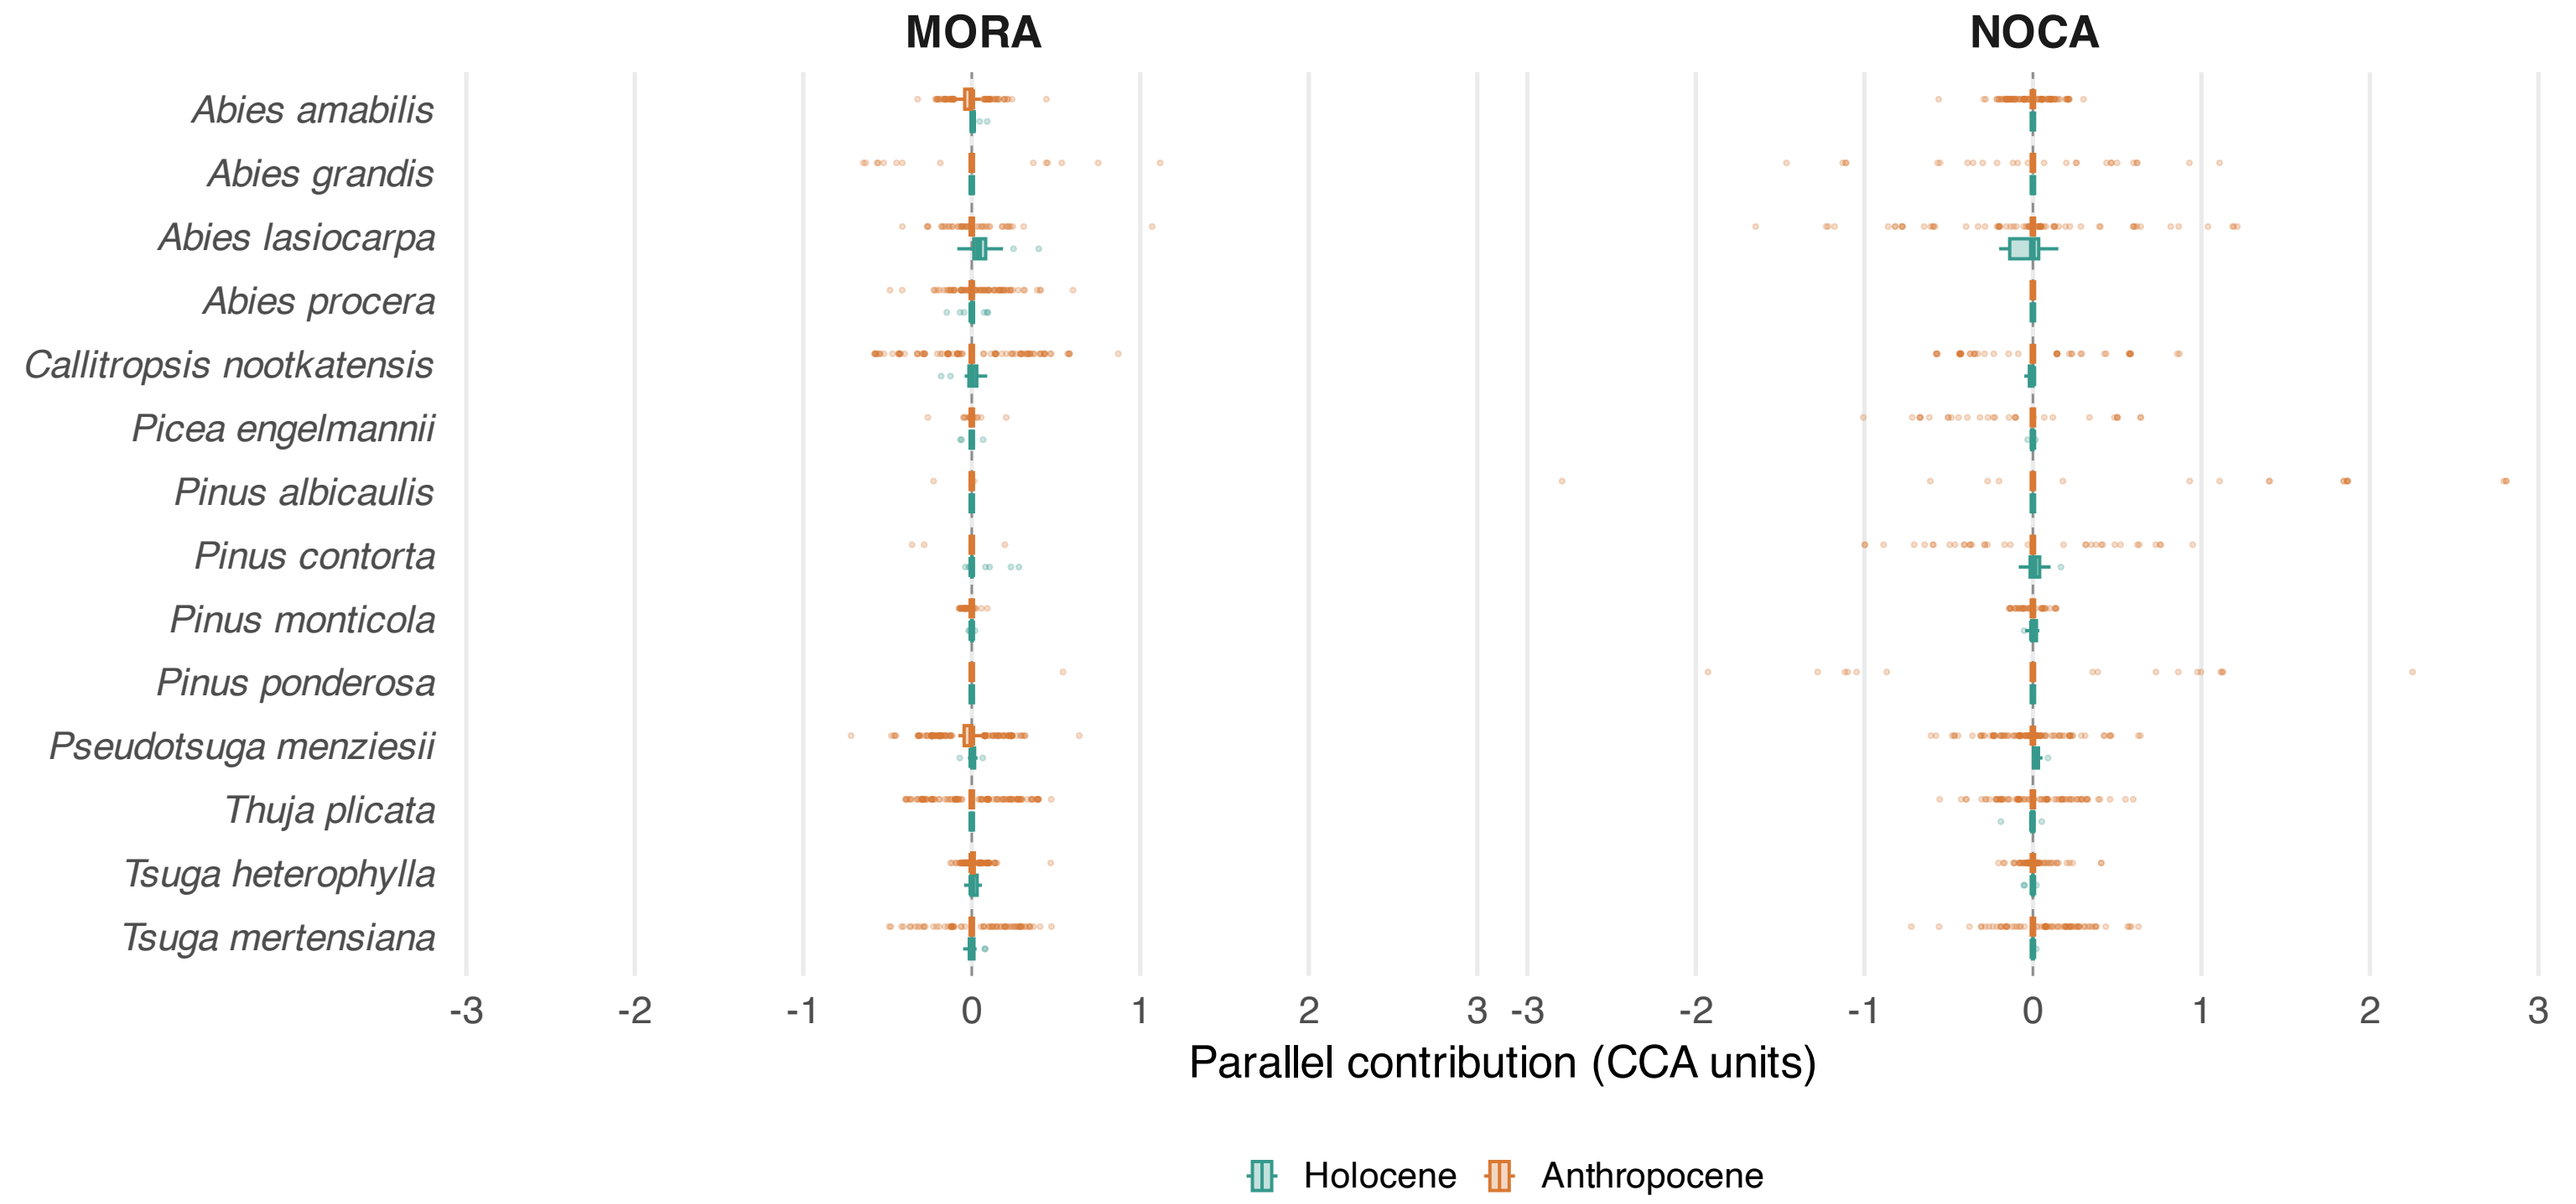

Offset 500 • Holocene: transition medians across valid Bacon draws; Anthropocene: individual plots

Boxes: median and quartiles; whiskers: 1.5 × IQR. Undefined projections omitted; zero contributions retained. Descriptive distributions.

Species contributions along climate-predicted movement

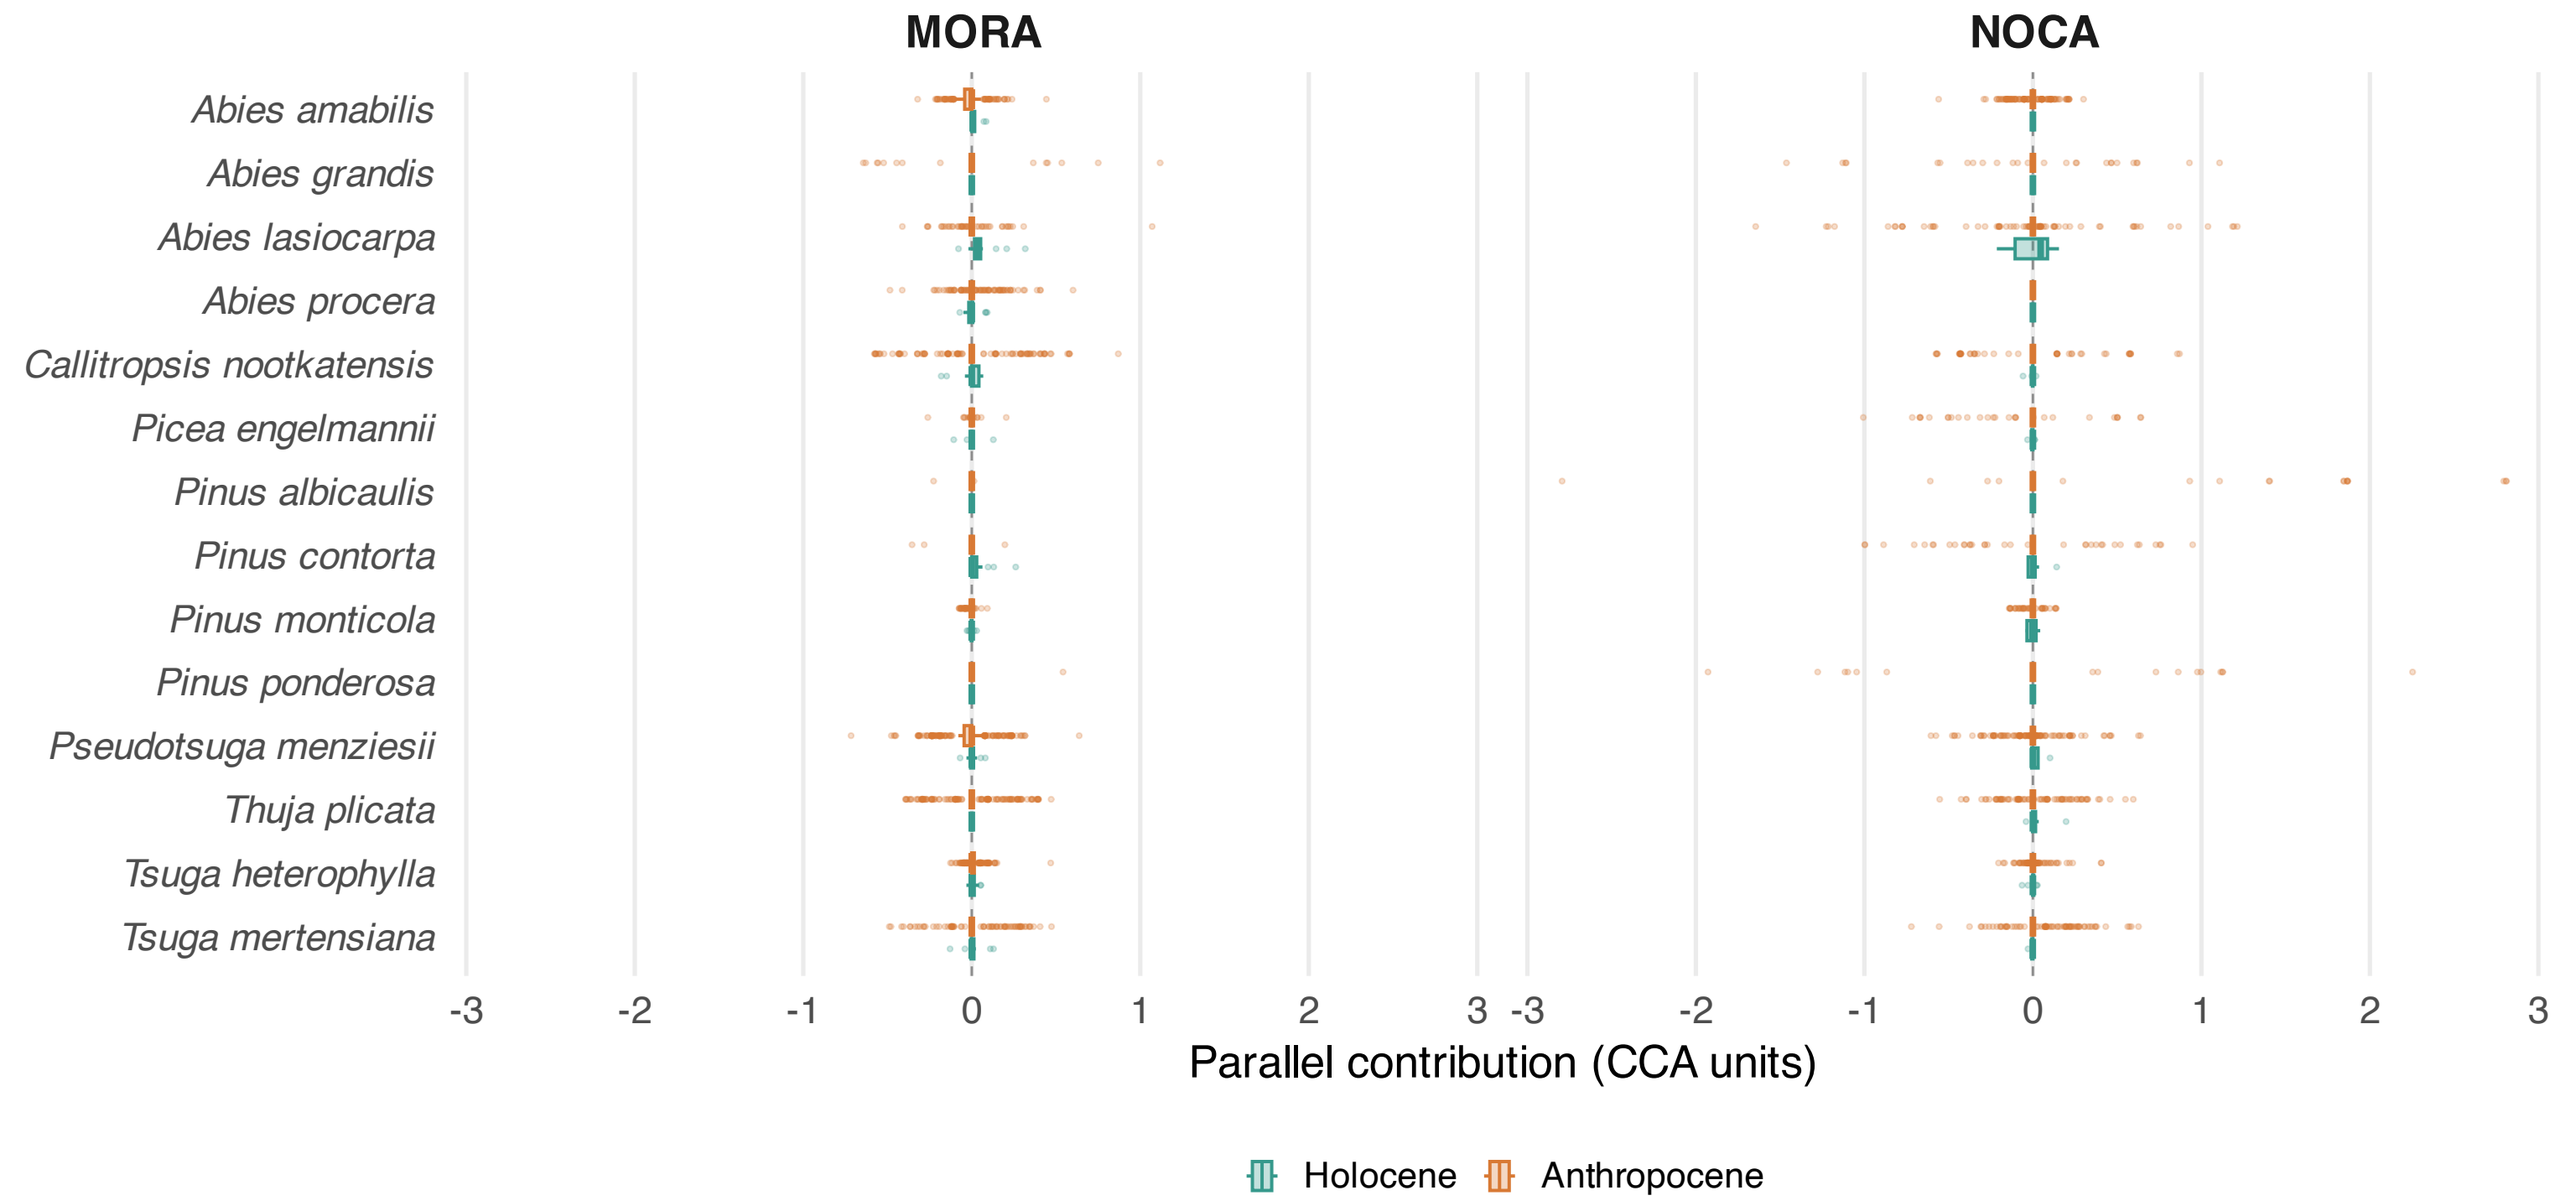

Offset 600 • Holocene: transition medians across valid Bacon draws; Anthropocene: individual plots

Boxes: median and quartiles; whiskers: 1.5 × IQR. Undefined projections omitted; zero contributions retained. Descriptive distributions.

Species contributions along climate-predicted movement

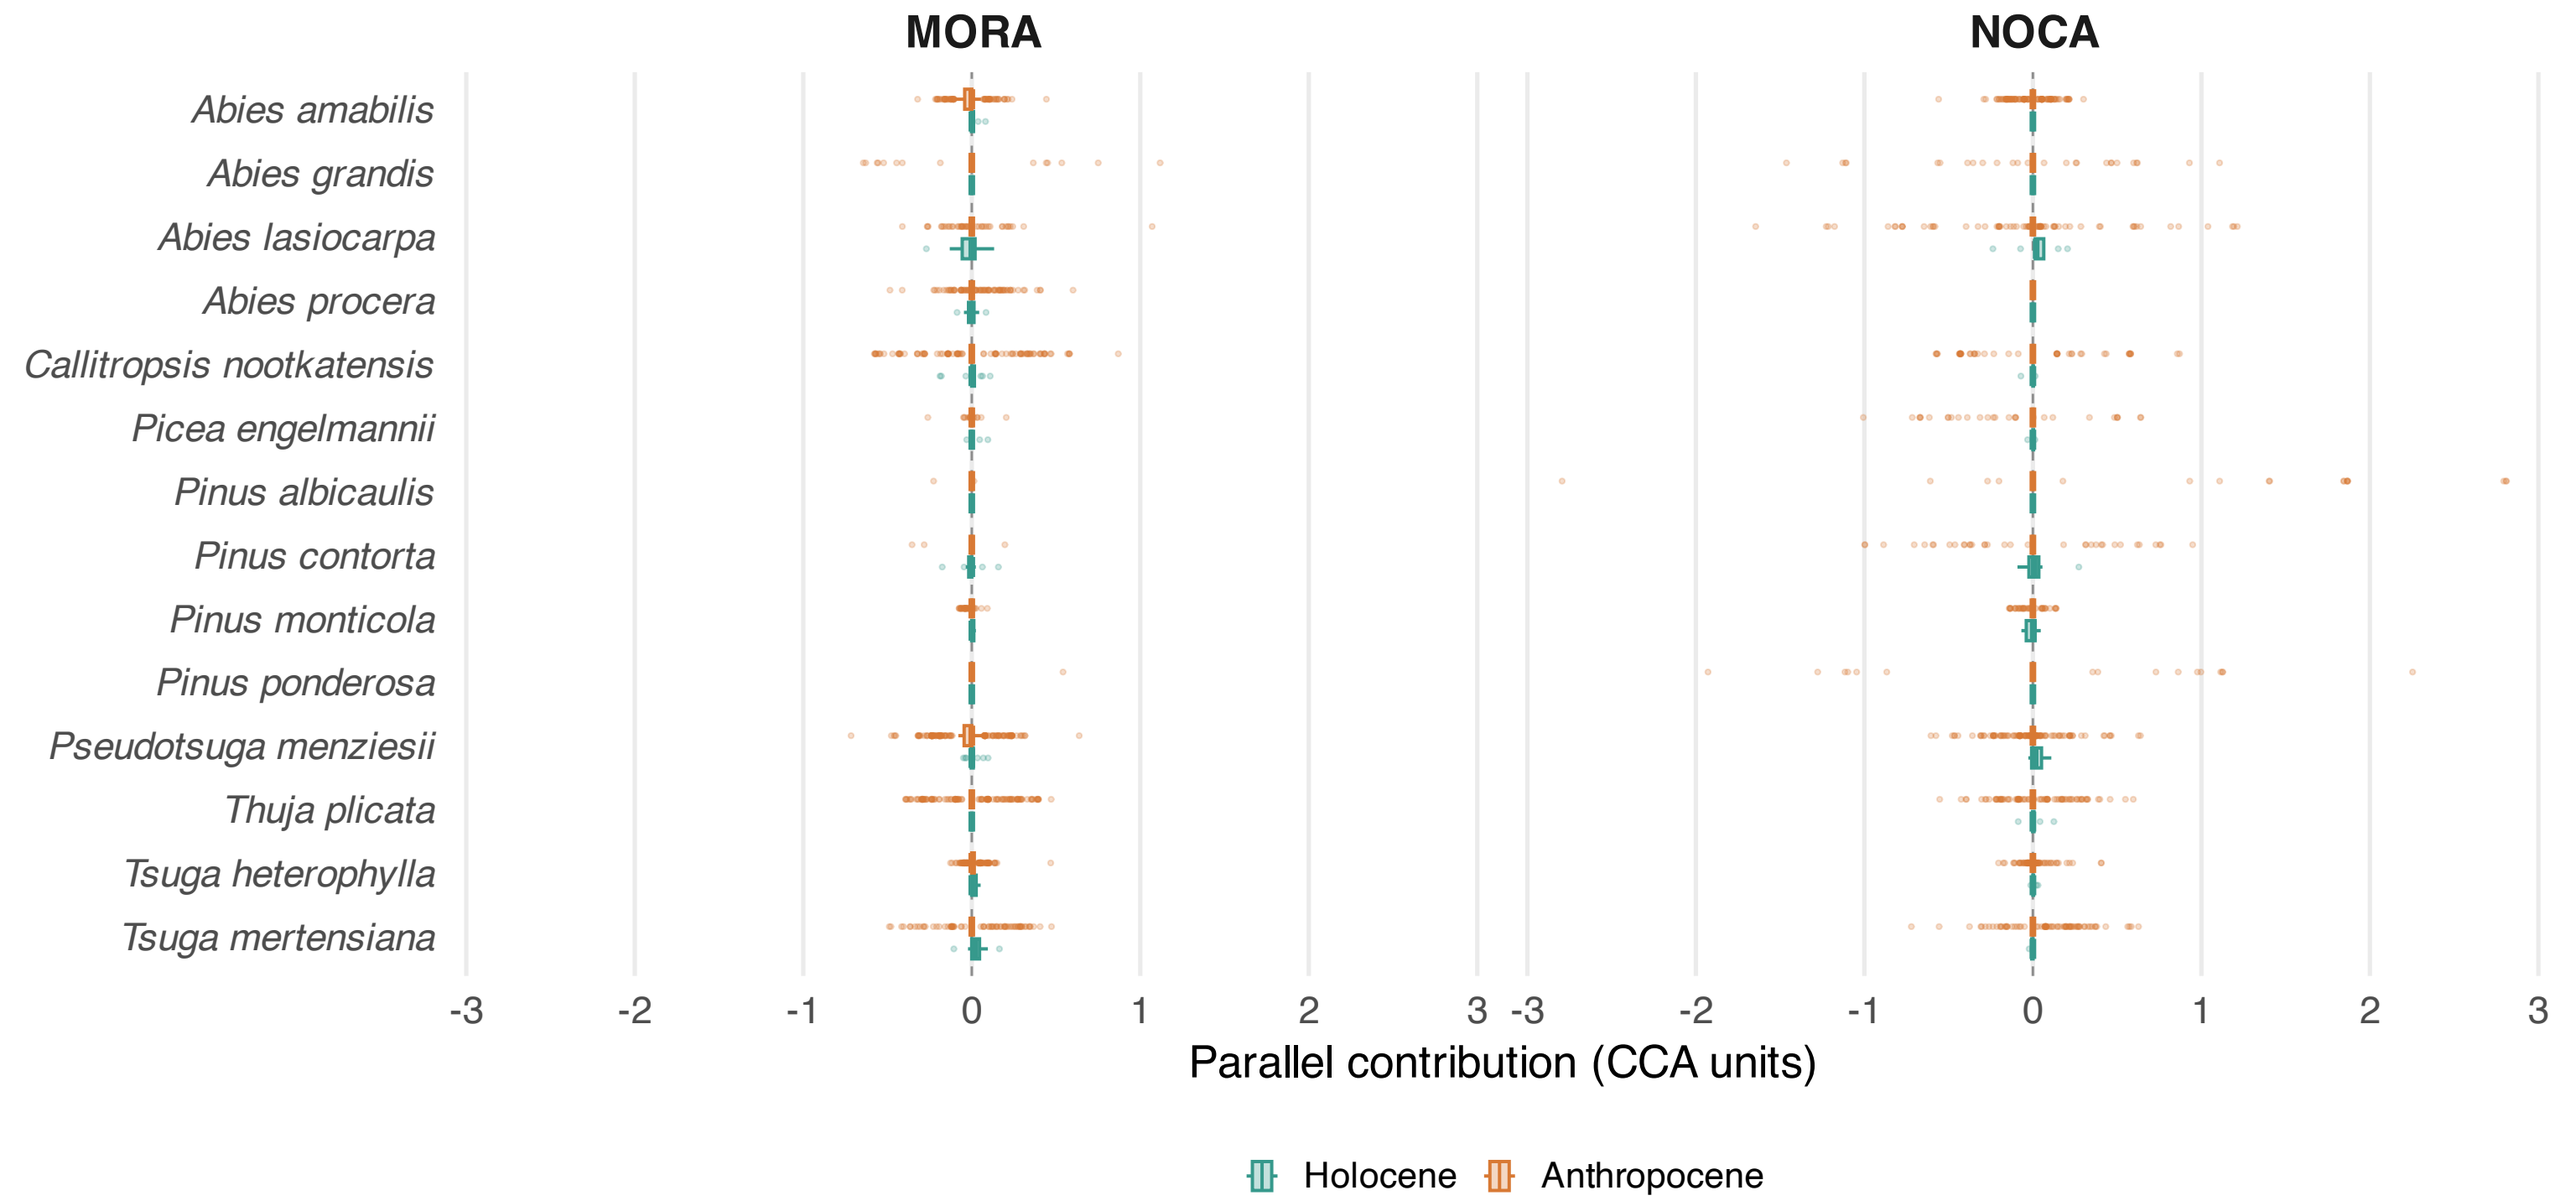

Offset 700 • Holocene: transition medians across valid Bacon draws; Anthropocene: individual plots

Boxes: median and quartiles; whiskers: 1.5 × IQR. Undefined projections omitted; zero contributions retained. Descriptive distributions.

Species contributions along climate-predicted movement

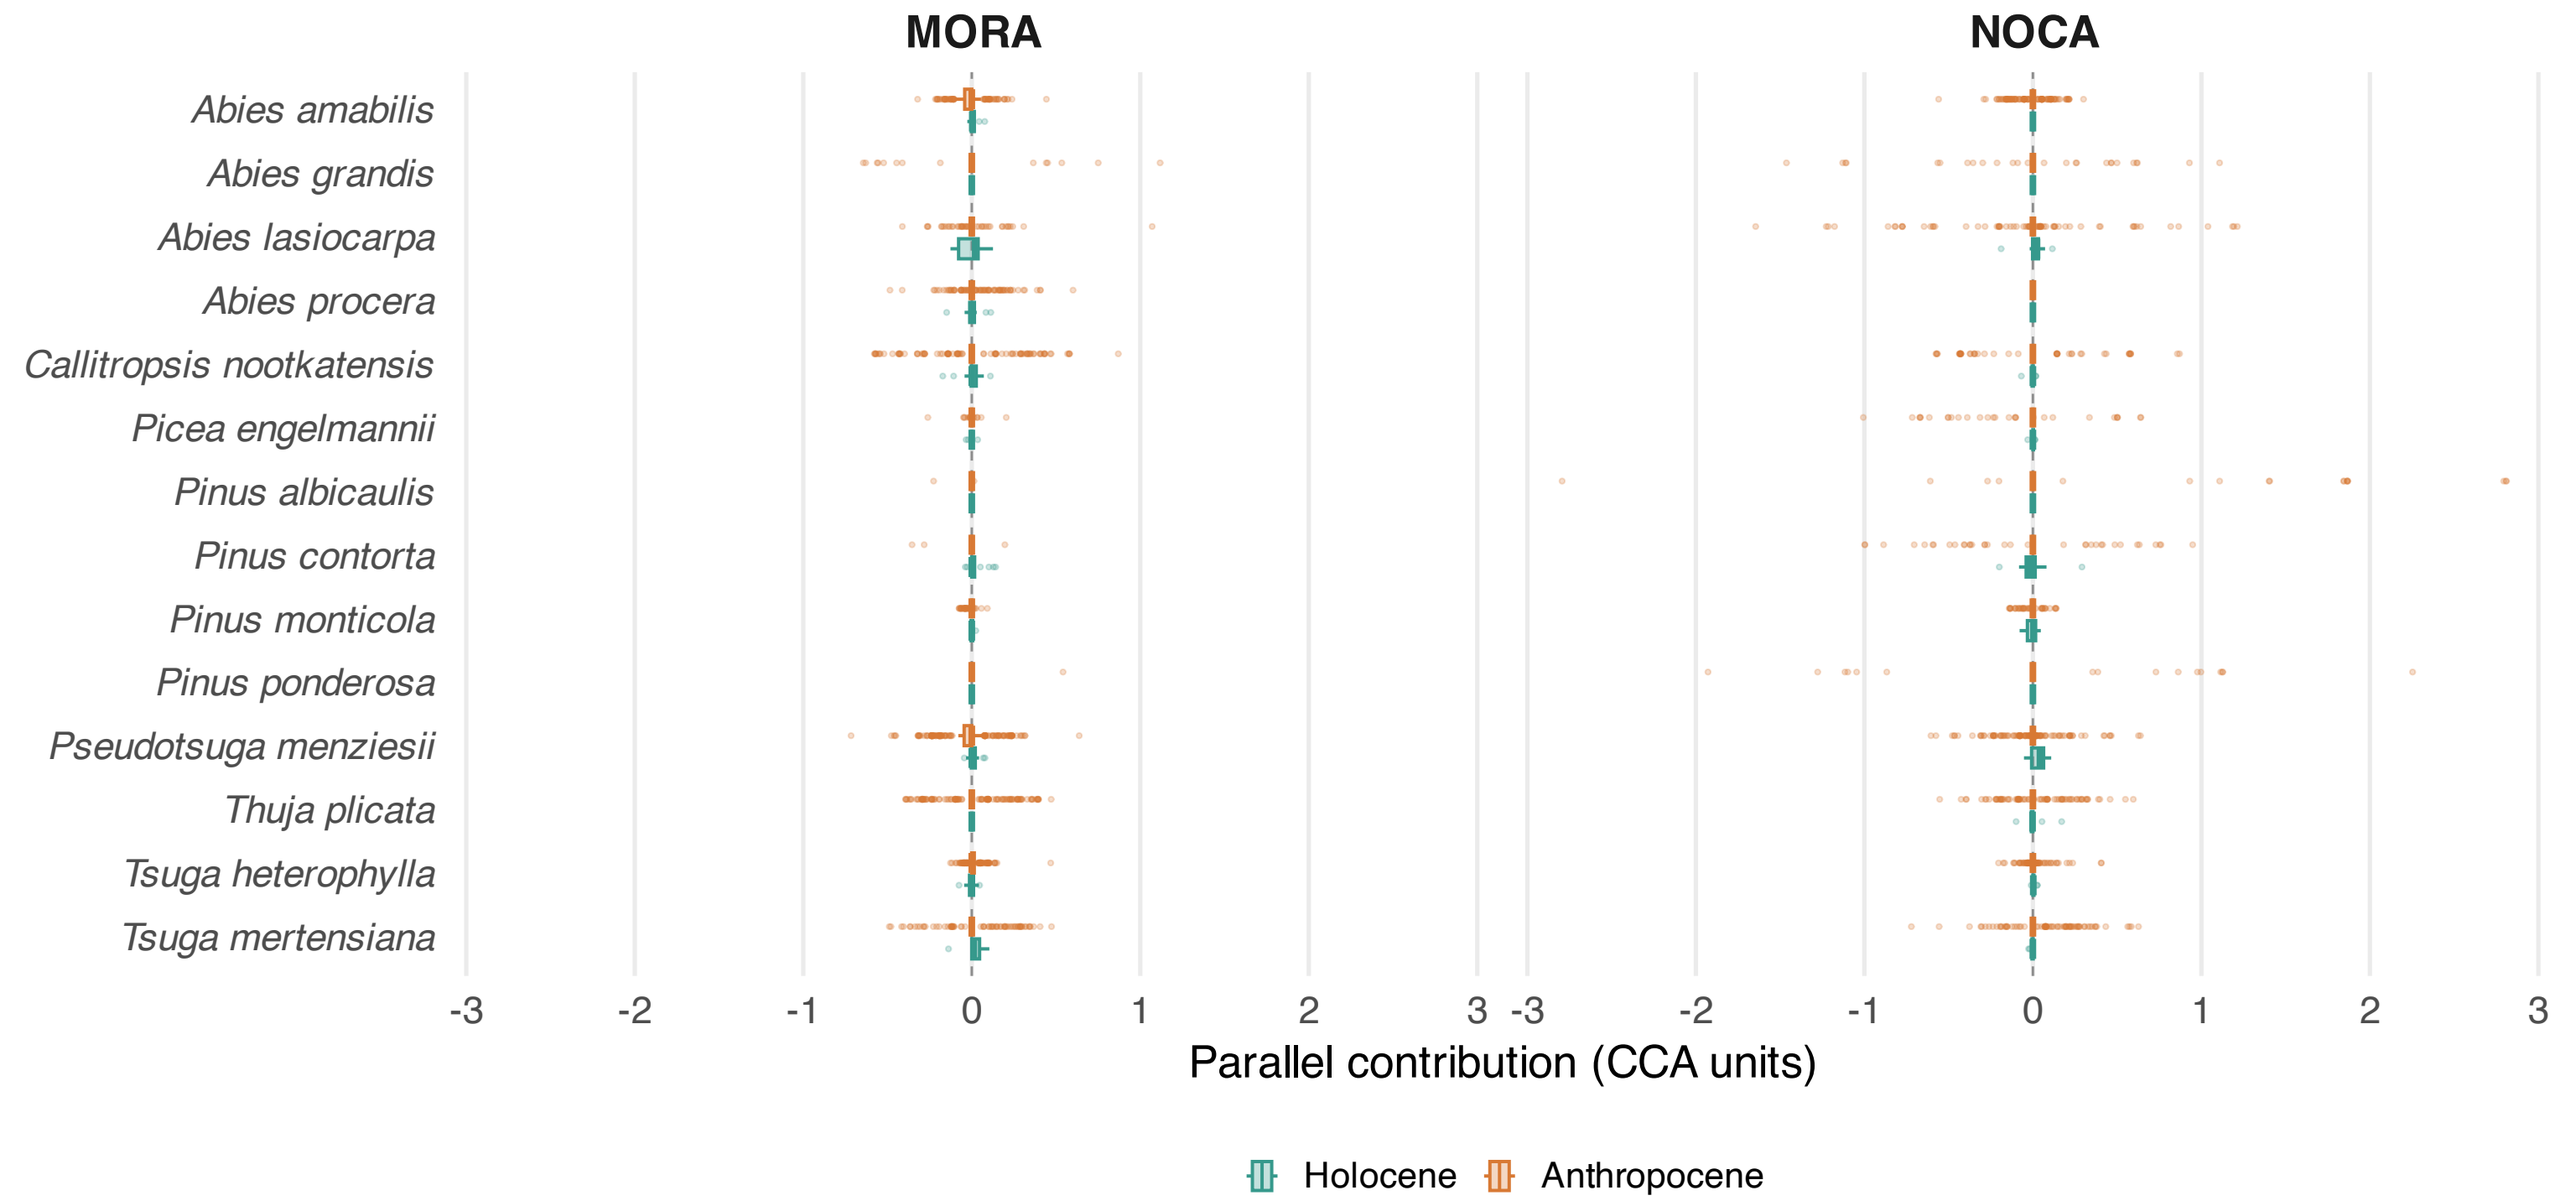

Offset 800 • Holocene: transition medians across valid Bacon draws; Anthropocene: individual plots

Boxes: median and quartiles; whiskers: 1.5 × IQR. Undefined projections omitted; zero contributions retained. Descriptive distributions.

Species contributions along climate-predicted movement

Offset 900 • Holocene: transition medians across valid Bacon draws; Anthropocene: individual plots

Boxes: median and quartiles; whiskers: 1.5 × IQR. Undefined projections omitted; zero contributions retained. Descriptive distributions.
