MA(1) lake sensitivity coefficients: Observed community turnover
Offset 0 ; each lake compared with modern pairs from its own park
Holocene mean (intercept)
Anthropocene − Holocene (era coefficient)
Jay Bath (MORA)
7 Holocene / 330 modern
Log Wallow (MORA)
7 Holocene / 330 modern
Reflection Pond (MORA)
6 Holocene / 330 modern
Panther Potholes (NOCA)
10 Holocene / 277 modern

Near boundary
No
Yes
Bars: unadjusted 95% t intervals. Coefficient panels use separate x−scales.
Triangles flag absolute correlation parameters > 0.98. MORA fits reuse modern plots. MA(1) selected; inference remains exploratory.
