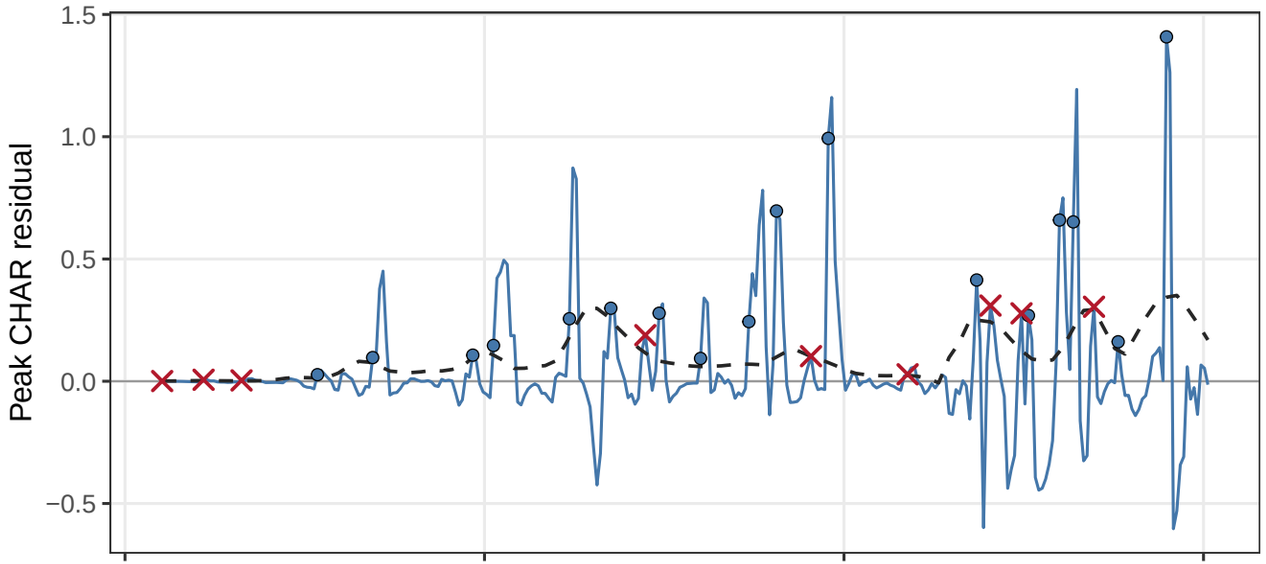
# Fire−event detection across the four lake records

Dashed = threshold; filled circle = accepted; red X = rejected by count screen

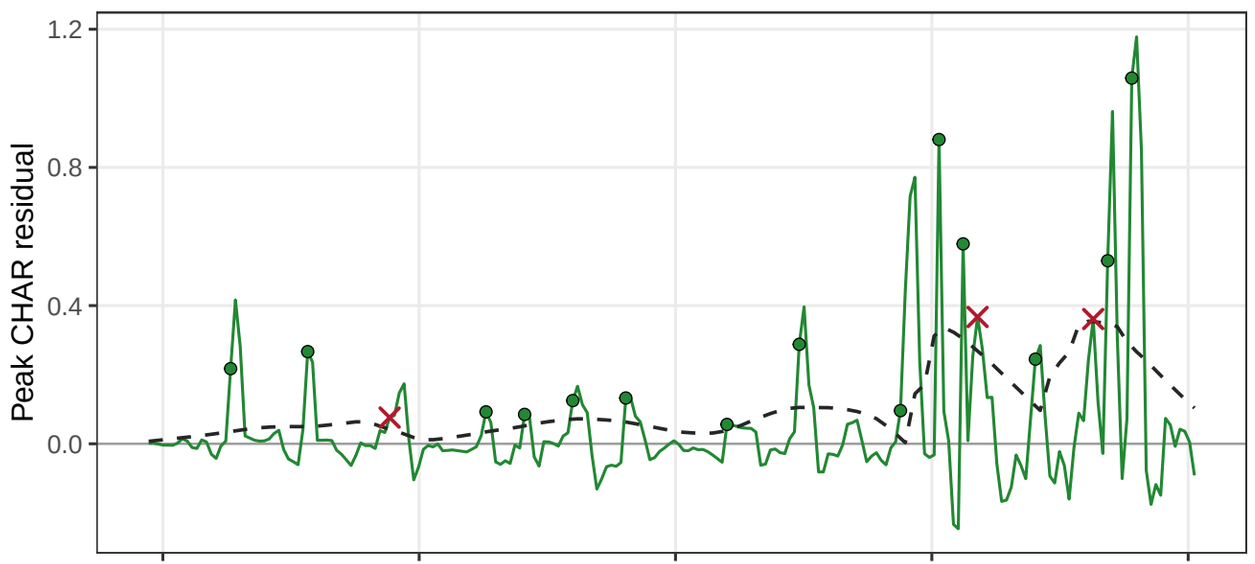
## Sunrise Lake: local 95% noise threshold

Interpolation 48 yr | background 800 yr
17 accepted events | 9 rejected peaks



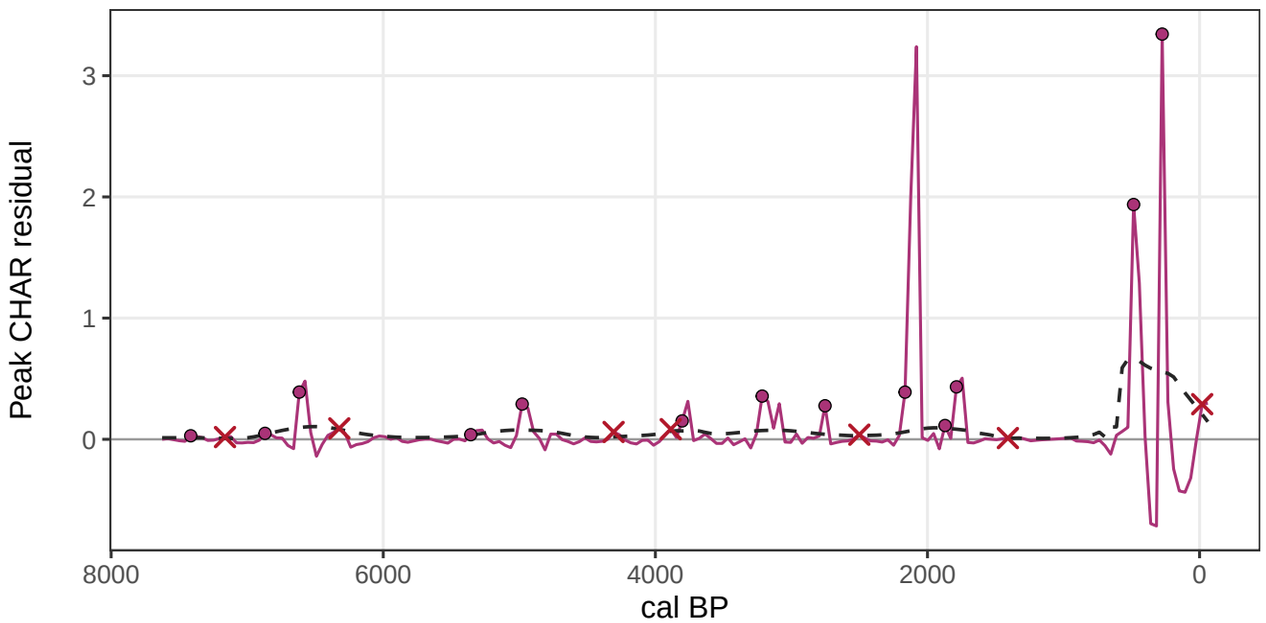
## Shadow Lake: local 95% noise threshold

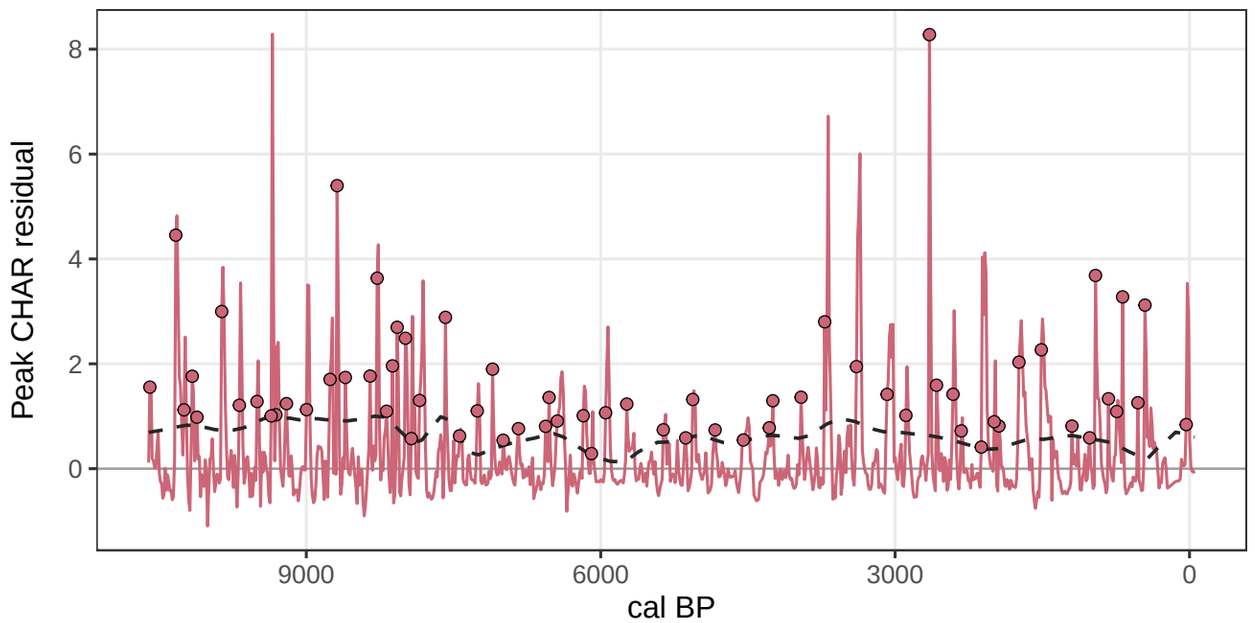
Interpolation 47 yr | background 1000 yr
14 accepted events | 3 rejected peaks



## Little Sunrise Lake: local 95% noise threshold

Interpolation 42 yr | background 500 yr
13 accepted events | 7 rejected peaks



## Panther Potholes: local 99% noise threshold


Interpolation 12 yr | background 500 yr
66 accepted events | 0 rejected peaks
